Decree of the Rector n. 601 of 09/08/2023
Competition for awarding 1 research grant at the University of Udine

DISCLAIMER:
The official and legally binding call for applications is in Italian only. This document cannot be used for legal purposes and is only meant to provide information in English on the call for applications (Decree of the Rector n. 601 of 09/08/2023). Please refer to the official call published on: https://www.uniud.it/it/albo-ufficiale

Any change and integration will be made available on the above mentioned web page. Therefore, no personal written communication regarding the examination date and/or competition results shall be provided to applicants.

Annex 1

Competition announcement for the assignment of 1 research grant at the University of Udine, entitled “Study of the amyloidogenic conversion of V30M, S52P and V122I transthyretin variants by real-time NMR: elucidation of the molecular mechanisms leading to different ATTR amyloidosis severity and different drug response” SSD: FIS/07 (principal investigator, Alessandra Corazza)

Art. 1
A selection procedure is hereby launched for the award of 1 research grant at the University of Udine, as identified in Attachment A which constitutes an integral part of the present announcement. The research grant is linked to the research project and is subject and conditioned upon the relative funding. The fellowship may be renewed, in compliance with Art. 22, Law No. 240 of 30 December 2010 (as in the text in force before the implementation of the Conversion Law of the D.L. 36/2022, L. 79/2022), Law No. 11 of 27 February 2015, and the current regulations of the University of Udine for awarding research grants, issued with the Rector’s Decree No. 182 of 31 March 2021. The renewal is subject to the scientific coordinator’s positive assessment of the researcher’s activities, an adequate scientific rationale, and a corresponding financial covering.

The research fellowship does not give rise to any right with regards to accessing University posts.

Any personal communication to candidates related to this selection will be sent exclusively to the email address indicated when registering for the selection, as mentioned in Art. 5.

Art. 2
The research grant described in this competition announcement and the required qualifications to apply for the position are identified in Attachment A. The lack of the admission requirements leads to the automatic exclusion from the competition procedure.

Possession of a PhD or equivalent degree obtained abroad or, only for the interested areas, of a medical specialization accompanied by an adequate scientific production, constitutes a preferential qualification for awarding the research fellowship of this selection, if it has not been provided as a mandatory requirement.
For the only purpose of the admission to the competition, the Examining Board (Art. 7) shall assess the equivalence of the qualification obtained abroad, except for the evaluation of the medical specialization qualification to which Article 38 of the Legislative Decree 165/2001 and subsequent modifications and additions, and EU regulations on the matter, shall be applied.

The Examining Board will proceed to the evaluation of the qualification obtained abroad according to the documentation attached to the application form. The Examining Board may exclude the candidate if the submitted documentation does not provide sufficient information for the assessment. Therefore, applicants must enclose all the documentation in their possession relating to their qualification in order to provide the Examining Board with sufficient information for assessment.

Candidates holding a qualification issued by a European Research Area country, if successful, must submit, if not already attached to the application form one of the following options:
- Supplement Diploma in English issued by the competent University.
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the "diplome" service at https://cimea.diplome.eu/udine/#/auth/login

Candidates holding a qualification issued by a non-European Research Area country, if successful, must submit, if not already attached to the application form one of the following options:
- Declaration of the on-site value of the qualification and the certificate relating to the degree with examinations and grades. A certificate in a language other than Italian or English must be accompanied by an official translation into one of these languages (certified by the competent diplomatic-consular authority or certified by a court in Italy).
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the "diplome" service at https://cimea.diplome.eu/udine/#/auth/login

If the Supplement Diploma or the statement/attestation of comparability are not available when signing the contract, the applicant must demonstrate that he/she has requested the documentation and submit it as soon as possible.

Any exclusion from the selection procedure due to lack of eligibility requirements, absence of required documents, failure to sign the selection application or submission of the selection application in a manner different from what is provided for in this call for applications will be communicated to applicants exclusively at the email address indicated in the application form.

Art. 3
The research grant referred to in this call for applications cannot be awarded:

a. to employees of Universities and the entities referred to in Article 22, section 1, of Italian Law no. 240 of 30 December 2010 (in the text prior to the reform introduced by Law no. 79 of 29 June 2022);

b. to those who have already been awarded research grants pursuant to Italian Law no. 240 of 30 December 2010 (prior to the reform introduced by Law no. 79 of 29 June 2022) for the maximum period provided by law, even if not continuously, excluding the period in which the grant was used in conjunction with the doctorate, up to the legal term of the relative course;

c. to those who have already benefited from research grants and fixed-term researcher contracts provided for, respectively, in Articles 22 and 24 of Italian Law no. 240 of 30 December 2010 (in the text prior to the reform introduced by Law no. 79 of 29 June 2022), for a total of 12 years, even if not consecutive;

d. to anyone who has a degree of kinship or affinity, up to and including the fourth degree, with:
- the Rector, the Director General or a member of the Board of Directors of the University of Udine;
- the scientific supervisor or a professor/researcher belonging to the department or organisation hosting the research grant in question.

The research grant provided for in this call for applications cannot be combined:

a) with scholarships of any kind, except for those granted by Italian or foreign institutions to supplement, by means of stays abroad, the fellow's training or research activities;
b) with other research grants;
c) with an employment relationship, even if part-time, without prejudice to the relevant provisions for employees of public administrations.

The grant awarded under this call for applications is also incompatible with simultaneous attendance at university degree courses, either Bachelor's degree or Master’s degree courses, research Doctorates with scholarships and medical specializations, in Italy or abroad.

**Art. 4**

Applicants must enclose with their application, under penalty of exclusion, the following documents:

a) their professional scientific CV, highlighting the candidate's aptitude for carrying out and implementing the research project (Attachment A);
b) their identity card, their passport or any other identification document¹;
c) (for candidates with a foreign qualification only) certification or self-certification of both the academic qualification required for the admission to the selection, and of the exams (with evaluation) took during the period of study abroad, and of any other document that can be useful to the evaluation of the degree by the Examining Board.

Applicants can attach to the application, publications and any other certification considered useful to demonstrate the qualification based on the research program (Attachment A) and to certify any research activity accomplished at public or private institutes (indicating the starting and ending date and the duration).

The documents and qualifications mentioned above must be submitted in Italian or English. Those that are not as requested will not be evaluated. Documents originally written in a language other than Italian or English must come with a translation in Italian or English, that the candidate will do on its own responsibility. The translation can be an abstract concerning the thesis.

Italian and Community candidates wishing to submit qualifications referring to conditions and facts attested by Public Administrations must proceed exclusively with self-certification.

Non-EU citizens legally residing in Italy may self-certify only data that can be verified or certified by Italian public bodies. They may also use declarations in lieu when provided for by an international convention between Italy and the declarant's country of origin.

Non-EU citizens not residing in Italy cannot self-certify.

Only the qualifications possessed by the candidate on the date the application form is submitted and submitted in accordance with the procedures set out in Article 5 will be assessed.

Failure to submit mandatory documents provided for in this article will constitute grounds for exclusion from the selection.

---

¹ Please be aware that the residence permit is not an identification document.
Art. 5
The submission of the applications for the present call starts on August 25, 2023 at 2:00 pm (Italian time) and ends on September 19, 2023 at 2:00 pm (Italian time).

The application to take part in the selection must be completed, under penalty of exclusion, using the appropriate online procedure, available at the link https://pica.cineca.it/
The procedure involves an applicant registration step, for those who do not already have an account, and then an application completion step.

Once completed, the online application must be signed in the manner described in the online procedure (manual signature with attached identity document or digital signature), under penalty of exclusion from selection. The application does not have to be signed if you access the above-mentioned online procedure using your SPID ID.

The qualifications referred to in Article 4 must be attached to the application in .pdf format. Individual .pdf files may not exceed 30MB.

The application for participation in the selection is automatically sent to the University of Udine with the definitive closing of the online procedure.

The University Administration:
- is not responsible if it is impossible to read the submitted documentation in electronic format due to damaged files;
- shall not accept or take into consideration qualifications or documents received in paper form or by any means other than what is specified in this article.

Reference to documents or publications already submitted in connection with other competitions is not allowed.

The Administration is not responsible for any missing document or communication because of inaccurate indication of residence and/or address submitted by the candidate during the application. Also, the Administration is not responsible if the candidate has not communicated changes in this information, or has communicated them too late. The Administration is also not responsible for any postal or telegraphic problems not attributable to the Administration itself.

Applicants are advised not to wait until the last few days before the closing date to submit their application. The University accepts no responsibility for any malfunctions due to technical problems and/or overloading of the communication line and/or application systems.

Art. 6
The selection procedure is held in accordance with the modality indicated in Attachment A.

The test will aim to assess the general preparation, experience and aptitude for research of the candidate. It will consist in the evaluation of the professional scientific curriculum, of the publications and qualifications presented, and of the interview, where foreseen.

Art. 7
The Examining board for the competition is identified in Attachment A of the present competition announcement, of which it is an integral part.
At its first meeting, the Examining board shall appoint its President and Secretary, and establish the criteria and methods for evaluating the qualifications and the interview, where foreseen.

The results of the qualifications assessment must be disclosed to applicants during the interview, where foreseen.

The Examining board can award a maximum of 100 points (one hundred out of one hundred) to the selection.

At the end of the evaluation procedure, the Examining board shall formulate the general merit list based on the overall score of each candidate, and draw up the minutes of the whole competition procedure.

Based on the ranking list, the assignment is awarded to candidates who have obtained a minimum overall score of 70/100 (seventy out of one hundred).

The Examining board's judgement is final.

The ranking list will be made public exclusively through publication on the University's official website.

Applicants will not be notified of the outcome of the evaluation.

Those who do not declare their acceptance of the research grant and do not present themselves at the research centre within the deadline communicated by the latter, even if not formally, shall lose the right to receive it. Exceptions to this term will only be granted in cases of documented force majeure.

**Art. 8**

The research activity cannot be started before signing the contract defining the terms and conditions of the collaboration.

The activity covered by the research grant must have the following characteristics:

a) it must be carried out as part of the research programme covered by the grant and not be a merely technical support to it;

b) it must have a close connection with the realization of the research program for which the winner of the grant has been awarded the contract;

c) it must be continuous and, in any case, temporally defined, not merely occasional, and in coordination with the overall activity of the University;

d) it must be carried out autonomously, solely within the limits of the programme prepared by the programme supervisor, without predetermined working hours.

The researcher is required to submit a detailed written report on the work carried out and the results achieved, accompanied by the opinion of the scientific supervisor, to the reference organisation at the intervals set out in the contract. The researcher must also submit interim reports and timesheets, if requested by the reference organisation.

Either the fellow or the reference organisation may withdraw from the contract. The reference organisation may terminate the contract not only in the cases referred to in Article 9, sections 2 and 3, of the "Internal rules for awarding research grants pursuant to law 240 of 30 December 2010" of the University of Udine, but also in the event the research project and therefore the financial coverage on which the research grant is based cease to exist.
Art. 9
The following legal dispositions shall apply to the grant referred to in this call for applications:
- for tax matters, the provisions of Article 4 of Italian Law no. 476 of 13 August 1984, as subsequently amended and supplemented;
- for social security matters, the provisions of Article 2(26) et seq. of Italian Law no. 335 of 8 August 1995, as subsequently amended and supplemented;
- for mandatory maternity leave, the provisions of the Italian Ministerial Decree of 12 July 2007;
- with regard to sick leave, the provisions of Article 1(788) of Italian Law no. 296 of 27 December 2006 and subsequent amendments.

During the period of mandatory maternity leave, the allowance paid by INPS according to Art. 5 of the Italian Ministerial Decree of 12 July 2007 is supplemented by the University up to the full amount of the research grant.

The grant will be paid in monthly instalments.

Art. 10
The data collected as part of the procedure referred to in Art. 5 are necessary to properly manage the selection procedure, for any subsequent management of the research grant and for purposes related to managing services provided by the University. The University of Udine is the Data Controller. At any time, the data subject may request access, rectification and, depending on the University's institutional purposes, cancellation and restriction of processing or oppose the processing of their data. The data subject can always lodge a complaint with the Italian Data Protection Authority. The complete disclosure is available on the University of Udine website in the "Privacy" section, accessible from the home page [www.uniud.it](http://www.uniud.it) Direct Link: [https://www.uniud.it/it/it/pagine-speciali/guida/privacy](https://www.uniud.it/it/it/pagine-speciali/guida/privacy)

Art. 11
For all matters not expressly mentioned in this call for applications, refer to the regulations in force on the subject cited in the introduction and to the "Internal rules for awarding research grants pursuant to Italian Law no. 240 of 30 December 2010" of the University of Udine, issued by Rector's Decree no. 182 of 31 March 2021.

Art. 12
The procedure supervisor is Dr Sandra Salvador, Head of the Research Services Area of the University of Udine.

The Responsible office at the University of Udine is “Area Servizi per la Ricerca - Ufficio Formazione per la Ricerca”, via Mantica n. 31 - 33100 Udine, Italia.

To request information about the call for applications, please complete the following form available on the University of Udine website:
[https://helpdesk.uniud.it/SubmitSR.jsp?type=req&accountId=universityofudine&populateSR_id=42105](https://helpdesk.uniud.it/SubmitSR.jsp?type=req&accountId=universityofudine&populateSR_id=42105)

**Titolo dell’assegno di ricerca / Topic of the research fellowship “assegno di ricerca”:**

I bandi sono consultabili dal sito dell’Ateneo, del MUR e di Euraxess / The calls are available on the University, MUR and Euraxess websites

**Testo in italiano:**

L'obiettivo della ricerca è quello di utilizzare l'NMR in soluzione per far luce sugli aspetti strutturali responsabili della diversa stabilità e propensione all'aggregazione della TTR V30M-, S52P- e V122I-rispetto alla TTR WT, e di dimostrare se e come gli hot spot scoperti siano invertiti da stabilizzatori mono- e bivalenti. La descrizione della dinamica della TTR sarà correlata all'efficacia del clivaggio proteolitico sulle diverse varianti e alla cinetica di dissociazione del tetramero. Il progetto è organizzato in 3 pacchetti di lavoro, WP1, WP2 e WP3.

WP1: Studio NMR in soluzione della struttura e della dinamica di V30M-, S52P- e V122I-TTR.

L'obiettivo del WP1 è individuare i determinanti strutturali e i processi di scambio per tutte le varianti in tutti gli intervalli temporali, da ps-ns a ore-giorni. Abbiamo già assegnato gli spettri delle varianti S52P e V122I utilizzando esperimenti di assegnazione della dorsale Trosy in 2D-3D su campioni triplicati (2H, 13C, 15N). Questi esperimenti hanno dimostrato che esistono più conformeri stabili in tempo NMR. Sfruttando l'etichettatura selettiva, utilizzeremo mezzi di crescita arricchiti in precursori (1H,13C) di Val, Ile, Leu per ottenere una descrizione dettagliata del nucleo della proteina e dell'interfaccia dimero-dimero. Su questa base, caratterizzeremo completamente gli aspetti strutturali e determineremo le variazioni a livello atomico rispetto alla WT-TTR. Particolare attenzione sarà rivolta a caratterizzare la presenza di ulteriori conformeri "stabili" che potrebbero avere una diversa propensione all'aggregazione. Misure di R1, R2 e (15N) HetNOE e misure di dispersione del rilassamento saranno eseguite con spettrometri a 700 e 900 MHz per descrivere la dinamica nell'intervallo ps-ms. Le misure di scambio idrogeno/deuterio contribuiranno alla descrizione degli equilibri di ripiegamento delle proteine con la determinazione dei fattori di protezione per ciascun residuo proteico.

Text in English:

Study of the amyloidogenic conversion of V30M, S52P and V122I transthyretin variants by real-time NMR: elucidation of the molecular mechanisms leading to different ATTR amyloidosis severity and different drug response.

WP1: Studio NMR in soluzione della struttura e della dinamica di V30M-, S52P- e V122I-TTR.

L'obiettivo del WP1 è individuare i determinanti strutturali e i processi di scambio per tutte le varianti in tutti gli intervalli temporali, da ps-ns a ore-giorni. Abbiamo già assegnato gli spettri delle varianti S52P e V122I utilizzando esperimenti di assegnazione della dorsale Trosy in 2D-3D su campioni triplicati (2H, 13C, 15N). Questi esperimenti hanno dimostrato che esistono più conformeri stabili in tempo NMR. Sfruttando l'etichettatura selettiva, utilizzeremo mezzi di crescita arricchiti in precursori (1H,13C) di Val, Ile, Leu per ottenere una descrizione dettagliata del nucleo della proteina e dell'interfaccia dimero-dimero. Su questa base, caratterizzeremo completamente gli aspetti strutturali e determineremo le variazioni a livello atomico rispetto alla WT-TTR. Particolare attenzione sarà rivolta a caratterizzare la presenza di ulteriori conformeri "stabili" che potrebbero avere una diversa propensione all'aggregazione. Misure di R1, R2 e (15N) HetNOE e misure di dispersione del rilassamento saranno eseguite con spettrometri a 700 e 900 MHz per descrivere la dinamica nell'intervallo ps-ms. Le misure di scambio idrogeno/deuterio contribuiranno alla descrizione degli equilibri di ripiegamento delle proteine con la determinazione dei fattori di protezione per ciascun residuo proteico.
WP2: Cinetica di dissociazione del tetramero mediante Rheo-NMR in tempo reale.
L'obiettivo del WP2 è descrivere la cinetica di dissociazione del tetramero delle varianti di TTR sotto l'effetto di forze meccaniche in presenza di plasmina mediante misure Rheo-NMR in tempo reale. Siamo in grado di tracciare la dissociazione del tetramero TTR, come mostrato nei risultati preliminari, misurando l'intensità dei picchi caratteristici della TTR tetramericca durante la MEM con spettri 2D [1H, 15N] Trosy. Siamo ora in grado di acquisire una serie di spettri 2D (con una frequenza di campionamento di uno spettro ogni due minuti) con il nuovo dispositivo Rheo-NMR, presto disponibile presso il Centro Grandi Strumenti dell'Università di Pavia, che consentirà di modulare le forze meccaniche e riprodurre il saggio MEM direttamente nella provetta NMR. L'analisi della cinetica permetterà di determinare la dissociazione del tetramero durante la MEM e di avviare la descrizione quantitativa dello schema cinetico. Saremo in grado di distinguere in quale fase del meccanismo le varianti studiate si comportano in modo diverso e di collegare queste informazioni funzionali agli aspetti strutturali/dinamici studiati nel WP1.

WP3: Effetto di ligandi mono- e bivalenti sulla struttura, la dinamica e la cinetica di dissociazione tetramerica di V30M-, S52P- e V122I-TTR.
L'obiettivo del WP3 è rivelare i cambiamenti nella struttura e nella dinamica di V30M-, S52P-e V122I-TTR indotti da ligandi mono- e bivalenti e come gli stabilizzatori cinetici influenzino la cinetica di dissociazione del tetramero. Analogamente al WP1, eseguiremo la descrizione strutturale delle varianti holo-TTR utilizzando proteine marcate con U-triplo e marcate seleктивmente. Questo ci permetterà di caratterizzare i cambiamenti strutturali indotti dai ligandi e, in particolare, di indagare se le molteplici forme "stabili" rilevate nell'apo-TTR regrediscono quando le varianti V122I e S52P sono legate a stabilizzatori. I dati di rilassamento NMR descriveranno le fluttuazioni strutturali delle varianti in un ampio intervallo di tempo. La nostra attenzione sarà rivolta anche ai possibili effetti differenziali dei ligandi mono- e bivalenti e alle correlazioni con la loro efficacia nell'inibire la fibrillogenesi.

Text in English:
The aim of the research is to use solution NMR to shed light on the structural aspects responsible for the different stability and aggregation propensity of V30M-, S52P- and V122I-TTR compared to WT-TTR, and to prove if and how the discovered hot spots are reverted by mono- and bivalent stabilizers. The description of TTR dynamics will be correlated with the efficacy of proteolytic cleavage on the different variants and with the dissociation kinetics of the tetramer. The project is organized in 3 work packages, WP1, WP2 and WP3.

WP1: NMR solution study of structure and dynamics of V30M-, S52P- and V122I-TTR.
The aim of WP1 is to determine the structural determinants and the exchange processes for all variants in all temporal ranges from ps-ns to hours-days. We have already assigned the spectra of S52P and V122I variants using 2D-3D Trosy backbone assignment experiments on triply labelled (2H, 13C, 15N) samples. These experiments have shown that there are multiple conformers that are stable in NMR time. Taking advantage of selective labelling, we will use growth media enriched in (1H,13C) Val, Ile, Leu precursors to obtain a detailed description of the protein core and the dimer-dimer interface. On this basis, we will fully characterize the structural aspects and determine variations at the atomic level compared to WT-TTR. Particular attention will be paid to characterize the presence of additional "stable" conformers that may have a different aggregation propensity. R1, R2 and {15N} HetNOE measurements as well as relaxation dispersion measurements will be performed with 700 and 900 MHz spectrometers to describe the dynamics in the ps-ms range. Hydrogen/deuterium exchange measurements will help in the description of protein folding equilibria with the determination of protection factors for each protein residue.

WP2: Kinetics of tetramer dissociation by real-time Rheo-NMR.
The aim of WP2 is to describe the tetramer dissociation kinetics of TTR variants under the effect of mechanical forces in the presence of plasmin by real-time Rheo-NMR measurements. We can track
TTR tetramer dissociation, as shown in preliminary results, by measuring the intensity of peaks characteristic of tetrameric TTR during MEM with 2D [\textsuperscript{1}H, \textsuperscript{15}N] Trosy spectra. We are now able to acquire a series of 2D spectra (with a sampling frequency of one spectrum every two minutes) with the new device Rheo-NMR, soon to be available at the Centro Grandi Strumenti of the University of Pavia, which will allow to modulate the mechanical forces and reproduce the MEM assay directly in the NMR tube. The analysis of the kinetics will allow to determine the dissociation of the tetramer during MEM, and to start the quantitative description of the kinetic scheme. We will be able to distinguish at which stage of the mechanism the studied variants behave differently and link this functional information to the structural/dynamical aspects studied in WP1.

**WP3: Effect of mono- and bivalent ligands on V30M-, S52P- and V122I-TTR structure, dynamics and tetrameric dissociation kinetics.**

The aim of WP3 is to reveal the changes in the structure and dynamics of V30M-, S52P- and V122I-TTR induced by mono- and bivalent ligands and how kinetic stabilizers affect the kinetics of tetramer dissociation. Similar to WP1, we will perform the structural description of holo-TTR variants using U-triple labelled and selectively labelled proteins. This will allow us to characterize the structural changes induced by the ligands and, in particular, to investigate if the multiple "stable" forms detected in apo-TTR revert when V122I and S52P variants are bound to stabilizers. NMR relaxation data will describe the structural fluctuations of the variants over a large time range. Our attention will also be directed to the possible differential effects of mono- and bivalent ligands and the correlations with their efficacy in inhibiting fibrillogenesis.
- professional scientific curriculum suitable for the research activity above mentioned.
