

Decree of the Rector n. 627 of 31/08/2023
Competition for awarding 1 research grant at the University of Udine

DISCLAIMER:

The official and legally binding call for applications is in Italian only. This document cannot be used for legal purposes and is only meant to provide information in English on the call for applications (Decree of the Rector n. 627 of 31/08/2023). Please refer to the official call published on: <https://www.uniud.it/it/albo-ufficiale>

Any change and integration will be made available on the above mentioned web page. Therefore, no personal written communication regarding the examination date and/or competition results shall be provided to applicants.

Annex 1

Competition announcement for the assignment of 1 research grant at the University of Udine, entitled "Weather and climate vulnerability in Italian demographic history" SSD: SECS-S/04 (principal investigator, Alessio Fornasin)

Research grant funded by the resources of the project PRIN 2022 - Prot. n. 2022AMC93A

Art. 1

A selection procedure is hereby launched for the award of 1 research grant at the University of Udine, as identified in Attachment A which constitutes an integral part of the present announcement.

The research grant is linked to the research project and is subject and conditioned upon the relative funding.

The fellowship may be renewed, in compliance with Art. 22, Law No. 240 of 30 December 2010 (as in the text in force before the implementation of the Conversion Law of the D.L. 36/2022, L. 79/2022), Law No. 11 of 27 February 2015, and the current regulations of the University of Udine for awarding research grants, issued with the Rector's Decree No. 182 of 31 March 2021. The renewal is subject to the scientific coordinator's positive assessment of the researcher's activities, an adequate scientific rationale, and a corresponding financial covering.

The research fellowship does not give rise to any right with regards to accessing University posts.

Any personal communication to candidates related to this selection will be sent exclusively to the email address indicated when registering for the selection, as mentioned in Art. 5.

Art. 2

The research grant described in this competition announcement and the required qualifications to apply for the position are identified in Attachment A. The lack of the admission requirements leads to the automatic exclusion from the competition procedure.

Possession of a PhD or equivalent degree obtained abroad or, only for the interested areas, of a medical specialization accompanied by an adequate scientific production, constitutes a preferential qualification for awarding the research fellowship of this selection, if it has not been provided as a mandatory requirement.

For the only purpose of the admission to the competition, the Examining Board (Art. 7) shall assess the equivalence of the qualification obtained abroad, except for the evaluation of the medical specialization qualification to which Article 38 of the Legislative Decree 165/2001 and subsequent modifications and additions, and EU regulations on the matter, shall be applied.

The Examining Board will proceed to the evaluation of the qualification obtained abroad according to the documentation attached to the application form. The Examining Board may exclude the candidate if the submitted documentation does not provide sufficient information for the assessment. Therefore, applicants must enclose all the documentation in their possession relating to their qualification in order to provide the Examining Board with sufficient information for assessment.

Candidates holding a qualification issued by a **European Research Area country**, if successful, must submit, if not already attached to the application form one of the following options:

- Supplement Diploma in English issued by the competent University.
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the "diplome" service at <https://cimea.diplome.eu/udine/#/auth/login>

Candidates holding a qualification issued by a **non-European Research Area country**, if successful, must submit, if not already attached to the application form one of the following options:

- Declaration of the on-site value of the qualification and the certificate relating to the degree with examinations and grades. A certificate in a language other than Italian or English must be accompanied by an official translation into one of these languages (certified by the competent diplomatic-consular authority or certified by a court in Italy).
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the "diplome" service at <https://cimea.diplome.eu/udine/#/auth/login>

If the Supplement Diploma or the statement/attestation of comparability are not available when signing the contract, the applicant must demonstrate that he/she has requested the documentation and submit it as soon as possible.

Any exclusion from the selection procedure due to lack of eligibility requirements, absence of required documents, failure to sign the selection application or submission of the selection application in a manner different from what is provided for in this call for applications will be communicated to applicants exclusively at the email address indicated in the application form.

Art. 3

The research grant referred to in this call for applications cannot be awarded:

- a. to employees of Universities and the entities referred to in Article 22, section 1, of Italian Law no. 240 of 30 December 2010 (in the text prior to the reform introduced by Law no. 79 of 29 June 2022);
- b. to those who have already been awarded research grants pursuant to Italian Law no. 240 of 30 December 2010 (prior to the reform introduced by Law no. 79 of 29 June 2022) for the maximum period provided by law, even if not continuously, excluding the period in which the grant was used in conjunction with the doctorate, up to the legal term of the relative course;
- c. to those who have already benefited from research grants and fixed-term researcher contracts provided for, respectively, in Articles 22 and 24 of Italian Law no. 240 of 30 December 2010 (in the text prior to the reform introduced by Law no. 79 of 29 June 2022), for a total of 12 years, even if not consecutive;

- d. to anyone who has a degree of kinship or affinity, up to and including the fourth degree, with:
- the Rector, the Director General or a member of the Board of Directors of the University of Udine;
 - the scientific supervisor or a professor/researcher belonging to the department or organisation hosting the research grant in question.

The research grant provided for in this call for applications cannot be combined:

- a) with scholarships of any kind, except for those granted by Italian or foreign institutions to supplement, by means of stays abroad, the fellow's training or research activities;
- b) with other research grants;
- c) with an employment relationship, even if part-time, without prejudice to the relevant provisions for employees of public administrations.

The grant awarded under this call for applications is also incompatible with simultaneous attendance at university degree courses, either Bachelor's degree or Master's degree courses, research Doctorates with scholarships and medical specializations, in Italy or abroad.

Art. 4

Applicants must enclose with their application, under penalty of exclusion, the following documents:

- a) their professional scientific CV, highlighting the candidate's aptitude for carrying out and implementing the research project (Attachment A);
- b) their identity card, their passport or any other identification document¹;
- c) (for candidates with a foreign qualification only) certification or self-certification of both the academic qualification required for the admission to the selection, and of the exams (with evaluation) took during the period of study abroad, and of any other document that can be useful to the evaluation of the degree by the Examining Board.

Applicants can attach to the application, publications and any other certification considered useful to demonstrate the qualification based on the research program (Attachment A) and to certify any research activity accomplished at public or private institutes (indicating the starting and ending date and the duration).

The documents and qualifications mentioned above must be submitted in Italian or English. Those that are not as requested will not be evaluated. Documents originally written in a language other than Italian or English must come with a translation in Italian or English, that the candidate will do on its own responsibility. The translation can be an abstract concerning the thesis.

Italian and Community candidates wishing to submit qualifications referring to conditions and facts attested by Public Administrations must proceed exclusively with self-certification.

Non-EU citizens legally residing in Italy may self-certify only data that can be verified or certified by Italian public bodies. They may also use declarations in lieu when provided for by an international convention between Italy and the declarant's country of origin.

Non-EU citizens not residing in Italy cannot self-certify.

Only the qualifications possessed by the candidate on the date the application form is submitted and submitted in accordance with the procedures set out in Article 5 will be assessed.

¹ Please be aware that the residence permit is not an identification document.

Failure to submit mandatory documents provided for in this article will constitute grounds for exclusion from the selection.

Art. 5

The submission of the applications for the present call starts on September 7, 2023 at 2:00 pm (Italian time) and ends on October 3, 2023 at 2:00 pm (Italian time).

The application to take part in the selection must be completed, under penalty of exclusion, using the appropriate online procedure, available at the link <https://pica.cineca.it/>. The procedure involves an applicant registration step, for those who do not already have an account, and then an application completion step.

Once completed, the online application must be signed in the manner described in the online procedure (manual signature with attached identity document or digital signature), under penalty of exclusion from selection. The application does not have to be signed if you access the above-mentioned online procedure using your SPID ID.

The qualifications referred to in Article 4 must be attached to the application in .pdf format. Individual .pdf files may not exceed 30MB.

The application for participation in the selection is automatically sent to the University of Udine with the definitive closing of the online procedure.

The University Administration:

- is not responsible if it is impossible to read the submitted documentation in electronic format due to damaged files;
- shall not accept or take into consideration qualifications or documents received in paper form or by any means other than what is specified in this article.

Reference to documents or publications already submitted in connection with other competitions is not allowed.

The Administration is not responsible for any missing document or communication because of inaccurate indication of residence and/or address submitted by the candidate during the application. Also, the Administration is not responsible if the candidate has not communicated changes in this information, or has communicated them too late. The Administration is also not responsible for any postal or telegraphic problems not attributable to the Administration itself.

Applicants are advised not to wait until the last few days before the closing date to submit their application. The University accepts no responsibility for any malfunctions due to technical problems and/or overloading of the communication line and/or application systems.

Art. 6

The selection procedure is held in accordance with the modality indicated in Attachment A.

The test will aim to assess the general preparation, experience and aptitude for research of the candidate. It will consist in the evaluation of the professional scientific curriculum, of the publications and qualifications presented, and of the interview, where foreseen.

Art. 7

The Examining board for the competition is identified in Attachment A of the present competition announcement, of which it is an integral part.

At its first meeting, the Examining board shall appoint its President and Secretary, and establish the criteria and methods for evaluating the qualifications and the interview, where foreseen.

The results of the qualifications assessment must be disclosed to applicants during the interview, where foreseen.

The Examining board can award a maximum of 100 points (one hundred out of one hundred) to the selection.

At the end of the evaluation procedure, the Examining board shall formulate the general merit list based on the overall score of each candidate, and draw up the minutes of the whole competition procedure.

Based on the ranking list, the assignment is awarded to candidates who have obtained a minimum overall score of 70/100 (seventy out of one hundred).

The Examining board's judgement is final.

The ranking list will be made public exclusively through publication on the University's official website.

Applicants will not be notified of the outcome of the evaluation.

Those who do not declare their acceptance of the research grant and do not present themselves at the research centre within the deadline communicated by the latter, even if not formally, shall lose the right to receive it. Exceptions to this term will only be granted in cases of documented force majeure.

Art. 8

The research activity cannot be started before signing the contract defining the terms and conditions of the collaboration.

The activity covered by the research grant must have the following characteristics:

- a) it must be carried out as part of the research programme covered by the grant and not be a merely technical support to it;
- b) it must have a close connection with the realization of the research program for which the winner of the grant has been awarded the contract;
- c) it must be continuous and, in any case, temporally defined, not merely occasional, and in coordination with the overall activity of the University;
- d) it must be carried out autonomously, solely within the limits of the programme prepared by the programme supervisor, without predetermined working hours.

The researcher is required to submit a detailed written report on the work carried out and the results achieved, accompanied by the opinion of the scientific supervisor, to the reference organisation at the intervals set out in the contract. The researcher must also submit interim reports and timesheets, if requested by the reference organisation.

Either the fellow or the reference organisation may withdraw from the contract.

The reference organisation may terminate the contract not only in the cases referred to in Article 9, sections 2 and 3, of the "Internal rules for awarding research grants pursuant to law 240 of 30 December 2010" of the University of Udine, but also in the event the research project and therefore the financial coverage on which the research grant is based cease to exist.

Art. 9

The following legal dispositions shall apply to the grant referred to in this call for applications:

- for tax matters, the provisions of Article 4 of Italian Law no. 476 of 13 August 1984, as subsequently amended and supplemented;
- for social security matters, the provisions of Article 2(26) *et seq.* of Italian Law no. 335 of 8 August 1995, as subsequently amended and supplemented;
- for mandatory maternity leave, the provisions of the Italian Ministerial Decree of 12 July 2007;
- with regard to sick leave, the provisions of Article 1(788) of Italian Law no. 296 of 27 December 2006 and subsequent amendments.

During the period of mandatory maternity leave, the allowance paid by INPS according to Art. 5 of the Italian Ministerial Decree of 12 July 2007 is supplemented by the University up to the full amount of the research grant.

The grant will be paid in monthly instalments.

Art. 10

The data collected as part of the procedure referred to in Art. 5 are necessary to properly manage the selection procedure, for any subsequent management of the research grant and for purposes related to managing services provided by the University. The University of Udine is the Data Controller. At any time, the data subject may request access, rectification and, depending on the University's institutional purposes, cancellation and restriction of processing or oppose the processing of their data. The data subject can always lodge a complaint with the Italian Data Protection Authority. The complete disclosure is available on the University of Udine website in the "Privacy" section, accessible from the home page www.uniud.it Direct Link: <https://www.uniud.it/it/it/pagine-speciali/guida/privacy>

Art. 11

For all matters not expressly mentioned in this call for applications, refer to the regulations in force on the subject cited in the introduction and to the "Internal rules for awarding research grants pursuant to Italian Law no. 240 of 30 December 2010" of the University of Udine, issued by Rector's Decree no. 182 of 31 March 2021.

Art. 12

The procedure supervisor is Dr Sandra Salvador, Head of the Research Services Area of the University of Udine.

The Responsible office at the University of Udine is "Area Servizi per la Ricerca - Ufficio Formazione per la Ricerca", via Mantica n. 31 - 33100 Udine, Italia.

To request information about the call for applications, please complete the following form available on the University of Udine website:

https://helpdesk.uniud.it/SubmitSR.jsp?type=req&accountId=universityofudine&populateSR_id=42105

Weather and climate vulnerability in Italian demographic history.

Obiettivi previsti e risultati attesi del programma di ricerca in cui si colloca l'attività dell'assegnista di ricerca / Foreseen objectives and results of the research programme performed by the research fellow "assegnista di ricerca":

I bandi sono consultabili dal sito dell'Ateneo, del MUR e di Euraxess / The calls are available on the University, MUR and Euraxess websites

Testo in italiano:

Lo scopo del progetto è identificare gli individui e i gruppi sociodemografici più vulnerabili all'impatto degli shock climatici e degli eventi meteorologici estremi del passato. Considereremo gli effetti di improvvise fluttuazioni nelle serie meteorologiche come temperature, precipitazioni, umidità e registrazioni del vento, nonché gli impatti di eventi climatici catastrofici come inondazioni, temperature elevate ed eccessi di neve da altre fonti storiche. Utilizzando fonti storiche, il presente progetto si concentrerà sul periodo che va dagli ultimi decenni del Settecento alla prima metà del Novecento, e prenderà in considerazione due regioni italiane, il Friuli e l'Emilia. L'intervallo di tempo va dal periodo preindustriale e pretransizionale all'inizio della transizione demografica e dell'industrializzazione per entrambe le due regioni. Considerando gli impatti a breve termine di eventi meteorologici estremi, definiamo individui vulnerabili come coloro che hanno sperimentato gli effetti di improvvise fluttuazioni meteorologiche con maggiore intensità rispetto ad altri in termini di aumento della mortalità, riduzione della fertilità, migrazioni e comportamenti matrimoniali. Inoltre, miriamo anche a fornire profili che descrivano i gruppi storici più vulnerabili in base alle loro caratteristiche demografiche (età, sesso e condizione coniugale), stato socioeconomico e impostazioni geografiche che distinguono aree rurali e urbane e regioni montuose e pianeggianti. Un secondo obiettivo del progetto è quello di fornire un quadro dei principali meccanismi attraverso i quali le fluttuazioni meteorologiche improvvise colpiscono gli individui più vulnerabili nei periodi storici. Poiché gli shock meteorologici potrebbero influenzare lo stato di salute e i comportamenti demografici, modificando direttamente le funzioni fisiologiche umane o agendo indirettamente attraverso gli effetti sulla produzione agricola, sull'approvvigionamento alimentare e sul peggioramento delle condizioni igienico-ambientali, questo progetto metterà in luce come gli individui, le famiglie e i gruppi socioeconomici hanno agito per proteggere i più vulnerabili in passato.

Entrando nello specifico del lavoro, in primo luogo, ci si propone di rilevare gli effetti delle fluttuazioni meteorologiche e meteorologiche sulla mortalità, propensione riproduttiva, matrimoniale e migratoria,

distinguendo per fasce di età, condizioni sociodemografiche e aree geografiche. Sulla base dei dati storici disponibili, ci concentreremo principalmente su individui di diverse età come neonati, bambini e anziani. In effetti, l'impatto delle fluttuazioni meteorologiche può variare tra i gruppi di età, influenzando i rischi di mortalità dovuti a diverse cause di morte e malattie. In primo luogo, ci concentreremo sulla mortalità infantile distinguendo la mortalità neonatale e post-neonatale e poi i diversi gruppi di età post-neonatale come 1-4, 5-8 e 9-12 mesi, poiché la sopravvivenza infantile varia durante e dopo lo svezzamento quando le cause esogene prevalgono i decessi correlati a determinanti ambientali e meteorologici. Allo stesso modo, considereremo anche l'impatto degli shock climatici sulla mortalità infantile tra 1 e 5 anni. Inoltre, si analizzeranno gli effetti delle fluttuazioni meteorologiche sui rischi di mortalità delle fasce di età più anziane in relazione al progressivo indebolimento fisiologico dovuto alla senescenza. Tuttavia, per esplorare a fondo l'impatto del tempo sui rischi di morte, prenderemo in considerazione altri possibili gruppi di età tra i bambini e gli anziani.

Le potenziali differenze di sesso saranno rilevate sistematicamente. Le conseguenze degli shock climatici possono mostrare gradienti secondo diversi gruppi socio-demografici a causa di condizioni materiali dissimili come sistemi di riscaldamento, vivere in case isolate, vestiti più (o meno) adeguati alle condizioni meteorologiche calde o fredde, strutture sanitarie e impianti idrici non contaminato da proliferazioni batteriche durante le giornate più calde. Sulla base delle informazioni storiche disponibili, classificheremo gli individui in base alle occupazioni dei padri e dei capifamiglia, considerando rispettivamente i bambini e gli anziani. Utilizzando le classificazioni HISCO (Historical International Standard Classification of Occupations) e HISCLASS (Historical International Social Class Scheme), assumiamo che lo stato socioeconomico possa essere una proxy rappresentativa delle condizioni materiali individuali. In alcuni casi, potremmo anche fare affidamento direttamente su specifiche informazioni sulla qualità della casa e sul sistema di riscaldamento.

Infine, le strutture domestiche possono essere importanti, poiché le famiglie potrebbero proteggere i loro membri dalle difficoltà meteorologiche e climatiche. I bambini o gli anziani in più famiglie potrebbero trarre vantaggio dalla conoscenza delle donne anziane e dei parenti (ad esempio, tecniche migliori per proteggere le persone da colpi di calore, ipotermia e malattie trasmesse per via aerea e idrica). Nel frattempo, le famiglie molto numerose aumentano la contagiosità delle infezioni aeree all'interno delle famiglie.

Strategie per i dati microdemografici. Per includere la seconda metà del XVIII secolo, adottiamo un approccio statistico per i dati aggregati, poiché sono disponibili solo serie demografiche mensili. Miriamo a colmare il divario relativo all'impatto meteorologico a breve termine sul sistema demografico storico prima e durante la transizione demografica. Rispetto alla precedente ricerca storica, questo progetto amplia le conoscenze riguardanti l'impatto a breve termine degli shock meteorologici sul sistema demografico non solo concentrandosi sulla mortalità, ma includendo altri esiti demografici come la fertilità, i matrimoni e le migrazioni. In questi termini, il progetto confronta gli effetti demografici degli shock meteorologici in diversi contesti geografici, utilizzando dati simili e gli stessi metodi.

Risultati attesi: creazione di due database. Il primo relativo a temperatura, pressione barometrica e piovosità relativa alla città di Udine nell'Ottocento e il secondo con i principali eventi demografici relativi alla città di Udine nello stesso periodo. Infine, con i dati così raccolti, ci si attende di individuare alcune delle principali relazioni tra fenomeni meteorologici e demografici.

Text in English:

The aim of the project is to identify the most vulnerable individuals and sociodemographic groups to the impact of climate shocks and extreme weather events in the past. We will consider the effects of sudden fluctuations in meteorological series such as temperatures, rain fall, humidity, and wind registrations as well as the impacts of catastrophic climatic events such as floods, heat waves, and snow excesses from other historical sources. Using historical sources, the present project will focus on the period from the last decades of the eighteenth century to the first half of the twentieth century, and will consider two Italian regions, Friuli and Emilia. The time interval spans from a typical preindustrial and pretransitional period to the onset of demographic transition and industrialization for both the two

regions. Considering the short-term impacts of extreme weather events, we define vulnerable individuals as those who experienced the effects of sudden meteorological fluctuations with more intensity than others in terms of increased mortality, reduced fertility, migration and marriage behaviors. In addition, we also aim to provide profiles that describe the most vulnerable historical groups according to their demographic characteristics (age, sex, and marital condition), socioeconomic status, and geographical settings distinguishing rural and urban areas, and mountains and flatland regions. A second objective of the project is to provide a framework of the main mechanisms through which sudden meteorological fluctuations impact the most vulnerable individuals in historical periods. Since meteorological shocks could affect health status and demographic behaviors, directly modifying human physiological functions or indirectly acting through the effects on agricultural production, food supplies, and worsening hygienic and environmental conditions, this project will highlight how individuals, families, and socioeconomic groups acted to protect the most vulnerable ones in the past.

Going into the specifics of the work, first, we aim to detect the effects of meteorological and weather fluctuations on mortality, reproductive, marriage and migration propensity, distinguishing by age groups, sociodemographic conditions, and geographical areas. On the basis of the available historical data, we will mainly focus on individuals of different ages such as infants, children, and the elderly. Indeed, the impact of weather fluctuations can vary between age groups, affecting mortality risks due to different causes of death and illnesses. First, we will focus on infant mortality distinguishing neonatal and post-neonatal mortality and then different post-neonatal age groups such as 1–4, 5–8, and 9–12 months, as infant survivorship varies during and after weaning when exogenous causes of death related to environmental and weather determinants prevail. Similarly, we will also consider the impact of climate shocks on child mortality between 1 and 5 years of age. In addition, we will analyze the effects of weather fluctuations on the mortality risks of older age groups in connection with the progressive physiological weakening due to senescence. However, to fully explore the weather impact on the death risks, we will consider other possible age groups between children and old ages.

Potential sex differences will be systematically detected. The consequences of climate shocks can show gradients according to different socio-demographic groups due to dissimilar material conditions such as heating systems, living in isolated houses, more (or less) adequate clothes to warm or cold meteorological conditions, sanitary structures, and water facilities not contaminated by bacterial growth during the warmest days. According to the available historical information, we will classify the individuals by their fathers' and household heads' occupations, considering children and older people, respectively. Using the HISCO (Historical International Standard Classification of Occupations) and the HISCLASS (Historical International Social Class Scheme) classifications, we assume that socioeconomic status can be a representative proxy of individual material conditions. We could also rely directly on specific house quality and heating system information in some cases.

Finally, household structures can matter, as families could protect their members from weather and climate difficulties. Children or the elderly in multiple households could benefit from the knowledge of older women and relatives (e.g., better techniques to protect individuals from heatstroke, hypothermia, and airborne and waterborne diseases). Meanwhile, very large families increase the contagiousness of airborne infections inside the households.

Strategies for micro-demographic data. To include the second half of the eighteenth century, we adopt a regression approach for count data, as only monthly demographic series are available. We aim to fill the gap concerning the short-term weather impact on the historical demographic system before and during the demographic transition. Respect to previous historical research, this project expands the knowledge regarding the short-term impact of weather shocks on the demographic system not only focusing on mortality, but including other demographic outcomes such as fertility, marriages and migrations. In these terms, the project compares the demographic effects of the weather shocks in different geographical settings, using similar data and same methods.

Expected results: creation of two databases. The first relating to temperature, barometric pressure and rainfall relating to the city of Udine in the 19th century and the second with the main demographic

events relating to the city of Udine in the same period. Finally, with the data thus collected, we expect to identify some of the main relationships between meteorological and demographic phenomena.

Struttura dell'Università di Udine presso la quale verrà sviluppata l'attività di ricerca / Department or other structure of the University of Udine where research activities will be carried out:

Dipartimento di Scienze Economiche e Statistiche (DIES) / Department of economics and statistics

Importo dell'assegno di ricerca (al lordo oneri carico assegnista) / Total grant gross for the research fellowship:

€ 19.367,00

Durata dell'assegno di ricerca / Duration of the research fellowship "assegno di ricerca":

12 mesi / months

Finanziamento / Financed by:

La copertura finanziaria graverà sul progetto PRIN 2022 – "Weather and climate vulnerability in Italian Demographic History"; Prot. n. 2022AMC93A. Decreto di finanziamento n. 1109 del 20/07/2023 - Settore SH7. Codice CUP G53D23003740006. Ministero dell'Università e della Ricerca (Finanziato dall'Unione Europea, NextGenerationEU).

Requisiti di ammissione / Minimum qualifications necessary:

- Possesso di un diploma di laurea vecchio ordinamento (ante decreto 3 novembre 1999 n. 509) o di laurea specialistica/magistrale (ex decreto 3 novembre 1999 n. 509 e decreto 22 ottobre 2004 n. 270) o titolo equivalente conseguito all'estero;
- possesso di un curriculum scientifico professionale idoneo allo svolgimento dell'attività di ricerca contemplata.
- University degree obtained before Decree n. 509 of 3 November 1999 or specialistic/Master's degree (post decree n. 509 of 3 November 1999 and decree n. 270 of 22 October 2004) or equivalent degree obtained abroad;
- professional scientific curriculum suitable for the research activity above mentioned.

Procedura selettiva / Competition procedure:

Valutazione per titoli e colloquio / Evaluation of titles and oral exam

I risultati della valutazione dei titoli saranno resi noti agli interessati nel corso del colloquio / The evaluation of the qualifications will be disclosed to candidates during the interview

Calendario del colloquio / Calendar of the oral exam	Modalità / Modality	Videoconferenza (piattaforma Microsoft Teams) / Videoconference (Microsoft Teams platform)
	Data / Date	12 ottobre / October 2023
	Ora / Time	16:00 / 4:00 pm (Italian time)
	Luogo / Place	–

Per sostenere il colloquio i candidati devono esibire un valido documento di riconoscimento. / Candidates must come to the interview with a valid identity document.

Eventuali variazioni saranno rese note esclusivamente mediante pubblicazione all'albo ufficiale on line dell'Ateneo / Any change will be made public solely through publication on the University web site http://web.uniud.it/ateneo/normativa/albo_ufficiale

Nota / Note: Le indicazioni sulle modalità di svolgimento della prova in modalità telematica saranno inviate ai candidati con successiva email da parte del Presidente della Commissione. Ai fini dell'identificazione e a pena di esclusione dalla procedura selettiva, ciascun candidato è tenuto ad identificarsi prima che il colloquio abbia inizio, esibendo il medesimo documento di identità allegato alla domanda di ammissione al concorso. Il candidato deve risultare reperibile nella giornata e all'orario indicato sul bando. Il mancato collegamento, l'irreperibilità del candidato nel giorno o nell'orario stabilito o la mancata esibizione del documento identificativo, sono motivo di esclusione dalla procedura selettiva. La registrazione delle prove orali è vietata. L'Ateneo adotterà pertanto tutti i provvedimenti in suo potere per tutelare i soggetti coinvolti qualora venissero diffuse tramite internet – o altri mezzi di diffusione pubblica – video, audio o immagini della procedura selettiva. / Instructions on how the video interviewing will be conducted will be provided to candidates by the Chairman of the Examining Board via email. For identification purposes, each candidate is required to identify him/herself before the interview by exhibiting the same identification document attached to the application. Candidates must be available on the day and time established by the call for applications. Failure of the candidate to establish a video connection, the unavailability of the candidate on the day and/or time established or failure of the candidate to provide the required identification document are all grounds for exclusion from the selection procedure. Recording of the video interviews is prohibited. The University will adopt all the measures within its power to protect all personnel involved as a result of dissemination via the internet or via other forms of public dissemination, of videos, audios or other pictures of the selection procedures.
