Decree of the Rector n. 1002 of 12/10/2023

Competition for awarding 1 research grant at the University of Udine

DISCLAIMER:
The official and legally binding call for applications is in Italian only. This document cannot be used for legal purposes and is only meant to provide information in English on the call for applications (Decree of the Rector n. 1002 of 12/10/2023). Please refer to the official call published on: https://www.uniud.it/it/albo-ufficiale

Any change and integration will be made available on the above mentioned web page. Therefore, no personal written communication regarding the examination date and/or competition results shall be provided to applicants.

Annex 1

Competition announcement for the assignment of 1 research grant at the University of Udine, entitled “The socio-economic Value of Horses in communal Italy: a digital history approach” SSD: M-STO/01 (principal investigator, Elisabetta Scarton)

Research grant co-funded by the resources of the project PRIN 2022 - Prot. n. 2022E9RTH8

Art. 1

A selection procedure is hereby launched for the award of 1 research grant at the University of Udine, as identified in Attachment A which constitutes an integral part of the present announcement. The research grant is linked to the research project and is subject and conditioned upon the relative funding. The fellowship may be renewed, in compliance with Art. 22, Law No. 240 of 30 December 2010 (as in the text in force before the implementation of the Conversion Law of the D.L. 36/2022, L. 79/2022), Law No. 11 of 27 February 2015, and the current regulations of the University of Udine for awarding research grants, issued with the Rector’s Decree No. 182 of 31 March 2021. The renewal is subject to the scientific coordinator’s positive assessment of the researcher’s activities, an adequate scientific rationale, and a corresponding financial covering.

The research fellowship does not give rise to any right with regards to accessing University posts.

Any personal communication to candidates related to this selection will be sent exclusively to the email address indicated when registering for the selection, as mentioned in Art. 5.

Art. 2

The research grant described in this competition announcement and the required qualifications to apply for the position are identified in Attachment A. The lack of the admission requirements leads to the automatic exclusion from the competition procedure.

Possession of a PhD or equivalent degree obtained abroad or, only for the interested areas, of a medical specialization accompanied by an adequate scientific production, constitutes a preferential qualification for awarding the research fellowship of this selection, if it has not been provided as a mandatory requirement.
For the only purpose of the admission to the competition, the Examining Board (Art. 7) shall assess the equivalence of the qualification obtained abroad, except for the evaluation of the medical specialization qualification to which Article 38 of the Legislative Decree 165/2001 and subsequent modifications and additions, and EU regulations on the matter, shall be applied.

The Examining Board will proceed to the evaluation of the qualification obtained abroad according to the documentation attached to the application form. The Examining Board may exclude the candidate if the submitted documentation does not provide sufficient information for the assessment. Therefore, applicants must enclose all the documentation in their possession relating to their qualification in order to provide the Examining Board with sufficient information for assessment.

Candidates holding a qualification issued by a European Research Area country, if successful, must submit, if not already attached to the application form one of the following options:
- Supplement Diploma in English issued by the competent University.
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the "diplome" service at https://cimea.diplo-me.eu/udine/#/auth/login

Candidates holding a qualification issued by a non-European Research Area country, if successful, must submit, if not already attached to the application form one of the following options:
- Declaration of the on-site value of the qualification and the certificate relating to the degree with examinations and grades. A certificate in a language other than Italian or English must be accompanied by an official translation into one of these languages (certified by the competent diplomatic-consular authority or certified by a court in Italy).
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the "diplome" service at https://cimea.diplo-me.eu/udine/#/auth/login

If the Supplement Diploma or the statement/attestation of comparability are not available when signing the contract, the applicant must demonstrate that he/she has requested the documentation and submit it as soon as possible.

Any exclusion from the selection procedure due to lack of eligibility requirements, absence of required documents, failure to sign the selection application or submission of the selection application in a manner different from what is provided for in this call for applications will be communicated to applicants exclusively at the email address indicated in the application form.

Art. 3

The research grant referred to in this call for applications cannot be awarded:

a. to employees of Universities and the entities referred to in Article 22, section 1, of Italian Law no. 240 of 30 December 2010 (in the text prior to the reform introduced by Law no. 79 of 29 June 2022);

b. to those who have already been awarded research grants pursuant to Italian Law no. 240 of 30 December 2010 (prior to the reform introduced by Law no. 79 of 29 June 2022) for the maximum period provided by law, even if not continuously, excluding the period in which the grant was used in conjunction with the doctorate, up to the legal term of the relative course;

c. to those who have already benefited from research grants and fixed-term researcher contracts provided for, respectively, in Articles 22 and 24 of Italian Law no. 240 of 30 December 2010 (in the...
text prior to the reform introduced by Law no. 79 of 29 June 2022), for a total of 12 years, even if not consecutive;

d. to anyone who has a degree of kinship or affinity, up to and including the fourth degree, with:
   - the Rector, the Director General or a member of the Board of Directors of the University of Udine;
   - the scientific supervisor or a professor/researcher belonging to the department or organisation
     hosting the research grant in question.

The research grant provided for in this call for applications cannot be combined:

a) with scholarships of any kind, except for those granted by Italian or foreign institutions to supplement, by means of stays abroad, the fellow's training or research activities;

b) with other research grants;

c) with an employment relationship, even if part-time, without prejudice to the relevant provisions for employees of public administrations.

The grant awarded under this call for applications is also incompatible with simultaneous attendance at university degree courses, either Bachelor's degree or Master’s degree courses, research Doctorates with scholarships and medical specializations, in Italy or abroad.

**Art. 4**

Applicants must enclose with their application, under penalty of exclusion, the following documents:

a) their professional scientific CV, highlighting the candidate's aptitude for carrying out and implementing the research project (Attachment A);

b) their identity card, their passport or any other identification document¹;

c) (for candidates with a foreign qualification only) certification or self-certification of both the academic qualification required for the admission to the selection, and of the exams (with evaluation) took during the period of study abroad, and of any other document that can be useful to the evaluation of the degree by the Examining Board.

Applicants can attach to the application, publications and any other certification considered useful to demonstrate the qualification based on the research program (Attachment A) and to certify any research activity accomplished at public or private institutes (indicating the starting and ending date and the duration).

The documents and qualifications mentioned above must be submitted in Italian or English. Those that are not as requested will not be evaluated. Documents originally written in a language other than Italian or English must come with a translation in Italian or English, that the candidate will do on its own responsibility. The translation can be an abstract concerning the thesis.

Italian and Community candidates wishing to submit qualifications referring to conditions and facts attested by Public Administrations must proceed exclusively with self-certification. Non-EU citizens legally residing in Italy may self-certify only data that can be verified or certified by Italian public bodies. They may also use declarations in lieu when provided for by an international convention between Italy and the declarant's country of origin. Non-EU citizens not residing in Italy cannot self-certify.

Only the qualifications possessed by the candidate on the date the application form is submitted and submitted in accordance with the procedures set out in Article 5 will be assessed.

¹ Please be aware that the residence permit is not an identification document.
Failure to submit mandatory documents provided for in this article will constitute grounds for exclusion from the selection.

Art. 5
The submission of the applications for the present call starts on October 19, 2023 at 2:00 pm (Italian time) and ends on November 9, 2023 at 2:00 pm (Italian time).

The application to take part in the selection must be completed, under penalty of exclusion, using the appropriate online procedure, available at the link https://pica.cineca.it/

The procedure involves an applicant registration step, for those who do not already have an account, and then an application completion step.

Once completed, the online application must be signed in the manner described in the online procedure (manual signature with attached identity document or digital signature), under penalty of exclusion from selection. The application does not have to be signed if you access the above-mentioned online procedure using your SPID ID.

The qualifications referred to in Article 4 must be attached to the application in .pdf format. Individual .pdf files may not exceed 30MB.

The application for participation in the selection is automatically sent to the University of Udine with the definitive closing of the online procedure.

The University Administration:
- is not responsible if it is impossible to read the submitted documentation in electronic format due to damaged files;
- shall not accept or take into consideration qualifications or documents received in paper form or by any means other than what is specified in this article.

Reference to documents or publications already submitted in connection with other competitions is not allowed.

The Administration is not responsible for any missing document or communication because of inaccurate indication of residence and/or address submitted by the candidate during the application. Also, the Administration is not responsible if the candidate has not communicated changes in this information, or has communicated them too late. The Administration is also not responsible for any postal or telegraphic problems not attributable to the Administration itself.

Applicants are advised not to wait until the last few days before the closing date to submit their application. The University accepts no responsibility for any malfunctions due to technical problems and/or overloading of the communication line and/or application systems.

Art. 6
The selection procedure is held in accordance with the modality indicated in Attachment A.

The test will aim to assess the general preparation, experience and aptitude for research of the candidate. It will consist in the evaluation of the professional scientific curriculum, of the publications and qualifications presented, and of the interview, where foreseen.
Art. 7
The Examing board for the competition is identified in Attachment A of the present competition announcement, of which it is an integral part.

At its first meeting, the Examining board shall appoint its President and Secretary, and establish the criteria and methods for evaluating the qualifications and the interview, where foreseen.

The results of the qualifications assessment must be disclosed to applicants during the interview, where foreseen.

The Examining board can award a maximum of 100 points (one hundred out of one hundred) to the selection.

At the end of the evaluation procedure, the Examining board shall formulate the general merit list based on the overall score of each candidate, and draw up the minutes of the whole competition procedure.

Based on the ranking list, the assignment is awarded to candidates who have obtained a minimum overall score of 70/100 (seventy out of one hundred).

The Examining board's judgement is final.

The ranking list will be made public exclusively through publication on the University's official website.

Applicants will not be notified of the outcome of the evaluation.

Those who do not declare their acceptance of the research grant and do not present themselves at the research centre within the deadline communicated by the latter, even if not formally, shall lose the right to receive it. Exceptions to this term will only be granted in cases of documented force majeure.

Art. 8
The activity covered by the research grant must have the following characteristics:

a) it must be carried out as part of the research programme covered by the grant and not be a merely technical support to it;

b) it must have a close connection with the realization of the research program for which the winner of the grant has been awarded the contract;

c) it must be continuous and, in any case, temporally defined, not merely occasional, and in coordination with the overall activity of the University;

d) it must be carried out autonomously, solely within the limits of the programme prepared by the programme supervisor, without predetermined working hours.

The researcher is required to submit a detailed written report on the work carried out and the results achieved, accompanied by the opinion of the scientific supervisor, to the reference organisation at the intervals set out in the contract. The researcher must also submit interim reports and timesheets, if requested by the reference organisation.

Either the fellow or the reference organisation may withdraw from the contract.
The reference organisation may terminate the contract not only in the cases referred to in Article 9, sections 2 and 3, of the "Internal rules for awarding research grants pursuant to law 240 of 30 December 2010" of the University of Udine, but also in the event the research project and therefore the financial coverage on which the research grant is based cease to exist.

Art. 9
The following legal dispositions shall apply to the grant referred to in this call for applications:
- for tax matters, the provisions of Article 4 of Italian Law no. 476 of 13 August 1984, as subsequently amended and supplemented;
- for social security matters, the provisions of Article 2(26) et seq. of Italian Law no. 335 of 8 August 1995, as subsequently amended and supplemented;
- for mandatory maternity leave, the provisions of the Italian Ministerial Decree of 12 July 2007;
- with regard to sick leave, the provisions of Article 1(788) of Italian Law no. 296 of 27 December 2006 and subsequent amendments.

During the period of mandatory maternity leave, the allowance paid by INPS according to Art. 5 of the Italian Ministerial Decree of 12 July 2007 is supplemented by the University up to the full amount of the research grant.

The grant will be paid in monthly instalments.

Art. 10
The data collected as part of the procedure referred to in Art. 5 are necessary to properly manage the selection procedure, for any subsequent management of the research grant and for purposes related to managing services provided by the University. The University of Udine is the Data Controller. At any time, the data subject may request access, rectification and, depending on the University's institutional purposes, cancellation and restriction of processing or oppose the processing of their data. The data subject can always lodge a complaint with the Italian Data Protection Authority. The complete disclosure is available on the University of Udine website in the "Privacy" section, accessible from the home page www.uniud.it Direct Link: https://www.uniud.it/it/it/pagine-speciali/guida/privacy

Art. 11
For all matters not expressly mentioned in this call for applications, refer to the regulations in force on the subject cited in the introduction and to the "Internal rules for awarding research grants pursuant to Italian Law no. 240 of 30 December 2010" of the University of Udine, issued by Rector's Decree no. 182 of 31 March 2021.

Art. 12
The procedure supervisor is Dr Sandra Salvador, Head of the Research Services Area of the University of Udine.

The Responsible office at the University of Udine is "Area Servizi per la Ricerca - Ufficio Formazione per la Ricerca", via Manticà n. 31 - 33100 Udine, Italia.

To request information about the call for applications, please complete the following form available on the University of Udine website: https://helpdesk.uniud.it/SubmitSR.jsp?type=req&accountId=universityofudine&populateSR_id=42105

Macrosettore concorsuale e Settore scientifico disciplinare / Scientific sector: 11/A1; M-STO/01 – Storia medievale

Titolo dell’assegno di ricerca / Topic of the research fellowship “assegno di ricerca”:

Obiettivi previsti e risultati attesi del programma di ricerca in cui si colloca l’attività dell’assegnista di ricerca / Foreseen objectives and results of the research programme performed by the research fellow "assegnista di ricerca":

Il progetto PRIN HistHor (A social history of horses in the age of the Italian commune) intende indagare il ruolo del cavallo nella società comunale italiana con uno sguardo ampio e interdisciplinare. La prospettiva che si intende perseguire mira a saldare la spaccatura tra studi cittadini e rurali, evidenziando come il cavallo collegasse in maniera profonda entrambi i mondi, sia dal punto di vista politico e sociale, sia economico.

Il ruolo pubblico e militare dei cavalli: sarà analizzato il ruolo, il significato e le implicazioni dell’impiego pubblico dei cavalli sia in ambito militare, sia in quello di ‘rappresentanza’. Particolare attenzione sarà prestata alla differenziazione delle razze e tipologie di cavallo in relazione all’uso, all’importanza del controllo comunale sulle forniture e ai meccanismi di gestione politica degli animali (risarcimenti, noleggi, etc.).

L’economia dei cavalli: data l’importanza politica e pubblica dei cavalli, l’analisi della dimensione economica degli animali dovrà partire necessariamente dallo studio della regolamentazione politica della loro circolazione. In particolare si intende analizzare il denso intreccio esistente tra l’economia dei cavalli (approvvigionamento, allevamento, sostentamento, alloggio, trasporto merci/ persone), controllo politico (limitazioni alla circolazione commerciale degli animali, liste e censimenti) e significato sociale (cavalli come status symbol) per
La ricerca intende identificare il valore socio-economico dell'animale. Lo studio socio-economico dei risarcimenti e dei censimenti di cavalli sarà condotto attraverso la costruzione di un database e di un webGIS.

3) L’allevamento: le pratiche di allevamento degli equini saranno analizzate da quattro punti di vista. Anzitutto da quello ambientale, valutando come lo sviluppo dell’allevamento equino in alcune aree sia da mettere in relazione alla disponibilità di colture foraggere e di incolti. Dovrà essere indagato inoltre il possibile passaggio dall’allevamento brado a quello stabulare. In secondo luogo e con un’ottica interdisciplinare che guarda all’archeologia e all’archeozooologia, sarà studiato il cavallo attraverso la cultura materiale. La terza linea di ricerca riguarda la selezione di razze e la possibile differenziazione funzionale tra queste ultime (razze usate in contesti militari, altre per trasporto o viaggio, etc.). Infine, verrà analizzato il corpus di conoscenze veterinarie dell’epoca e la loro eventuale applicazione pratica attraverso i libri di conti, soprattutto di realtà signorili come i Conti di Savoia e i Principi di Savoia-Acaia.

Nel complesso il progetto intende analizzare come l’età comunale abbia influenzato e impattato sulle condizioni di vita dei cavalli e nella relazione tra questi ultimi e l’uomo.

### Stato dell’arte

### Descrizione del progetto
L’attività di ricerca sarà ripartita tra le tre unità del PRIN.

L’unità di Milano si occuperà dell’utilizzo militare e del significato pubblico dei cavalli. Partendo da un tentativo di reinterpretazione del ruolo della cavalleria nell’Italia comunale, si focalizzerà sul valore di bene comune dei cavalli e sulla rilevanza delle politiche di controllo messe in atto per garantirne il congruo numero.

L’unità di Bergamo si focalizzerà su aree meno estese in modo da poter implementare un approccio fortemente interdisciplinare che coinvolga archeozooliti e paleobotanici. La finalità è di delineare i rapporti tra allevamento equino e ambiente storico, individuando mutazioni e linee di rottura. Questa ricerca si svolgerà parallelamente allo studio dei trattati e delle opere di mariscalchi e veterinaria medievali.

L’unità di Udine curerà lo studio della dimensione economica dei cavalli. In particolare l’obiettivo è di creare delle serie di prezzi e/o risarcimenti per un’ampia area in modo tale da poter implementare un database e un webGIS. Lo scopo dell’approccio fortemente digitale è di tentare di mettere in relazione su mappa geografica le catene di approvvigionamento dei comuni con altri dati come la distribuzione degli abitati, le informazioni sull’ambiente storico, la presenza di aree di pascolo. Compito dell’unità di
Udine sarà la creazione e implementazione del database e del GIS collegato: l’assegnista dovrà quindi avere competenza ed esperienza in questo settore.
Sebbene ciascuna unità curi uno specifico tema del progetto i dati raccolti dalla ricerca di base saranno condivisi apertamente in modo da ampliare il più possibile l’area geografica coperta da ciascuna unità.

### Possibili potenzialità applicative

Nel complesso il progetto mira a sviluppare un intenso dialogo interdisciplinare tra studiosi di ambito storico (storia economica, animal history, archeologia e archeozoologia) e quelli provenienti dalle scienze naturali. I seminari tematici coinvolgeranno biologi ed etologi anche nel contesto di specifiche collaborazioni come il CRC Gaia 205 dell’Università di Milano.
Il progetto mira a creare un webGIS open source che usi l’approccio degli open data e che garantisca un’ampia e più libera disseminazione dei risultati. Questo strumento potrà essere usato anche per progetti promozionali mirati al grande pubblico che permettano la riscoperta dell’ambiente storico.
Possibili impatti dal punto di vista economico potranno emergere dalla collaborazione con l’Istituto di Ecologia Applicata (http://ieaitaly.org/) e dalla ricostruzione delle varietà storiche di cavallo come I Pentro del Molise e I Bardigiano dell’Appennino parmigiano. Attraverso disseminazione tra gli allevatori dell’area e presso il grande pubblico in queste aree sarà possibile sensibilizzare alla conservazione delle razze storiche di equini e alla riflessione sull’impatto bilaterale tra allevamento e ambiente. L’attenzione alla fauna locale e all’ambiente storico sarà poi un’occasione per enfatizzare e sottolineare le peculiarità delle aree studiate e l’importanza della tutela della biodiversità e del suo portato storico.

### Text in English:

**Abstract**

The PRIN project HistHor (A social history of horses in the age of the Italian commune) intends to investigate the role of the horse in Italian communal society with a broad and interdisciplinary look. It aims at narrowing the gap between urban and rural studies, highlighting how the horse profoundly connected both worlds, politically and socially, as well as economically.

**Objectives of the project**

In particular, the following will be studied:

1) The public and military role of horses: the role, significance and implications of the public use of horses in both the military and ‘representative’ spheres will be analysed. Particular attention will be paid to the differentiation of breeds and types of horses in relation to use, the importance of municipal control over supply and the mechanisms of political management of animals (compensation, noli, etc.).

2) The economics of horses: given the political and public importance of horses, the analysis of the economic dimension of animals must
necessarily start from the study of the political regulation of their circulation. A focus will be on the dense intertwining of the economy of horses (supply, breeding, sustenance, accommodation, transport of commodities/individuals), political control (restrictions on the commercial circulation of animals, lists and censuses) and social significance (horses as status symbols) in an attempt to identify the socio-economic value of the animal. The socio-economic study of horse compensation and censuses will be conducted through the construction of a database and webGIS.

3) Breeding: horse breeding practices will be analysed from four points of view. First of all, from the environmental one, evaluating how the development of horse breeding in some areas is to be related to the availability of forage crops and fallow land. The possible shift from wild to stabled breeding will also have to be investigated. Secondly and with an interdisciplinary perspective looking at archaeology and archaeozoology, the horse will be studied through material culture. The third line of research concerns the selection of breeds and the possible functional differentiation between them (breeds used in military contexts, others for transport or travel, etc.). Finally, we will analyse the body of veterinary knowledge of the time and its possible practical application through account books, especially of lordly contexts such as the Counts of Savoy and the Princes of Savoy-Achaia.

Overall, the project intends to analyse how the communal age influenced and impacted on the living conditions of horses and the relationship between horses and man.

| State of the art | The key role of the horse within Italian municipal society has long been a fixed point in historiography. In particular, Jean-Claude Maire Vigueur’s studies (Maire Vigueur 2003) on urban militia have emphasised the value and role of the horse as a social marker. Despite this, however, studies in the Italian area have mainly focused on a more classically ‘cultural’ dimension, which has privileged iconographic and literary analysis (Frugoni 2018). Thus, both the economic and etho-ecological dimensions (central to the recent ‘animal turn’; Ritvo 2007) have been essentially ignored. Even within the field of rural history and animal husbandry, the horse is still substantially under-represented in relation to its weight within medieval society. |
| Project description | The research activity will be divided among the three PRIN units. Milan will deal with the military use and public significance of horses. Starting from an attempt to reinterpret the role of chivalry in communal Italy, it will focus on the value of horses as a common good and the relevance of the control policies implemented to ensure their adequate numbers. Bergamo will focus on less extensive geographical areas in order to implement a strongly interdisciplinary approach involving archaeozoologists and palaeobotanists. The aim is to delineate the relationships between horse breeding and the historical environment, identifying mutations and lines of rupture. This research will be carried out in parallel with the study of medieval mariscalcia and veterinary treatises and works. Udine will study the economic dimension of horses. In particular, the aim is to create price and/or compensation series for a wide area in order to... |
implement a database and webGIS. The purpose of the highly digital approach is to attempt to relate the supply chains of the municipalities on a geographical map with other data such as the distribution of settlements, information on the historical environment, and the presence of grazing areas. The task of the Udine unit will be the creation and implementation of the database and the associated GIS: the research assistant must therefore have competence and experience in this area.

Although each unit deals with a specific topic of the project, the data collected from the basic research will be shared openly in order to extend the geographical area covered by each unit as much as possible.

### Possible application potentialities

Overall, the project aims to develop an intensive interdisciplinary dialogue between scholars from the historical field (economic history, animal history, archaeology and archaeozoology) and those from the natural sciences. Thematic seminars will also involve biologists and ethologists in the context of specific collaborations such as the CRC Gaia 205 at the University of Milan.

The project aims to create an open source webGIS that uses the open data approach and ensures a broad and more free dissemination of results. This tool can also be used for promotional projects aimed at the general public to rediscover the historic environment. Possible impacts from an economic point of view may emerge from the collaboration with the Institute of Applied Ecology (http://ieaitaly.org/) and the reconstruction of historical horse varieties such as the Pentro of Molise and the Bardigiano of the Parmesan Appennines. Through dissemination among breeders in the area and to the general public in these areas, it will be possible to raise awareness for the preservation of historical horse breeds and reflection on the bilateral impact between breeding and the environment. The focus on the local fauna and the historical environment will then be an opportunity to emphasise and underline the peculiarities of the areas studied and the importance of the protection of biodiversity and its historical background.
