Any personal communication to candidates related to this selection will be sent exclusively to the email address indicated when registering for the selection, as mentioned in Art. 5.

Art. 2
The research grant described in this competition announcement and the required qualifications to apply for the position are identified in Attachment A. The lack of the admission requirements leads to the automatic exclusion from the competition procedure.

Possession of a PhD or equivalent degree obtained abroad or, only for the interested areas, of a medical specialization accompanied by an adequate scientific production, constitutes a preferential qualification for awarding the research fellowship of this selection, if it has not been provided as a mandatory requirement.
For the only purpose of the admission to the competition, the Examining Board (Art. 7) shall assess the equivalence of the qualification obtained abroad, except for the evaluation of the medical specialization qualification to which Article 38 of the Legislative Decree 165/2001 and subsequent modifications and additions, and EU regulations on the matter, shall be applied.

The Examining Board will proceed to the evaluation of the qualification obtained abroad according to the documentation attached to the application form. The Examining Board may exclude the candidate if the submitted documentation does not provide sufficient information for the assessment. Therefore, applicants must enclose all the documentation in their possession relating to their qualification in order to provide the Examining Board with sufficient information for assessment.

Candidates holding a qualification issued by a European Research Area country, if successful, must submit, if not already attached to the application form one of the following options:
- Supplement Diploma in English issued by the competent University.
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the “diplome” service at https://cimea.diplo-me.eu/udine/#/auth/login

Candidates holding a qualification issued by a non-European Research Area country, if successful, must submit, if not already attached to the application form one of the following options:
- Declaration of the on-site value of the qualification and the certificate relating to the degree with examinations and grades. - CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the “diplome” service at https://cimea.diplo-me.eu/udine/#/auth/login

If the Supplement Diploma or the statement/attestation of comparability are not available when signing the contract, the applicant must demonstrate that he/she has requested the documentation and submit it as soon as possible.

Any exclusion from the selection procedure due to lack of eligibility requirements, absence of required documents, failure to sign the selection application or submission of the selection application in a manner different from what is provided for in this call for applications will be communicated to applicants exclusively at the email address indicated in the application form.

Testo in italiano:  
Negli ultimi decenni le mostre di architettura sono diventate oggetto di studio specifico, come conferma la diffusione internazionale di convegni e pubblicazioni dedicate a questo tema. Il progetto PER - Pensiero Esibito Radicale intende ripercorrere la storia delle esposizioni di architettura allestite in Italia dalla seconda metà del XIX secolo a oggi, nella prospettiva di evidenziare l’essenza del contributo italiano, specifica nel pur vasto panorama europeo e internazionale di mostre e ricerche. Particolare attenzione sarà riservata, nella proposta, al concetto di esposizione quale opportunità essenziale e irrinunciabile per esibire il fondamento radicale – inteso come momento generativo – del progetto di architettura e i suoi esiti culturali, sociali, politici ed economici. Nel tempo, architetti, artisti, critici e curatori hanno generato un vasto corpus di mostre di architettura, dal quale emerge come questi eventi (1) siano stati, in casi particolari, dei veri manifesti capaci di ridefinire i fondamenti del progetto; (2) abbiano allargato l’indagine intorno alle qualità dello spazio; (3) si siano offerti come luoghi di discussione e elaborazione di progetti sperimentali; (4) abbiano veicolato nuove idee di città e collettività; (5) abbiano mostrato, ai pubblici, i principi culturali del progetto di architettura; (6) abbiano intercettato problematiche contingenti quali la sostenibilità sociale e ambientale, l’economia circolare, la difesa dei diritti, ecc. Data la complessità e l’ampiazzone del tema, il progetto prevede un approccio scientifico che coniuga un’analisi storica dei diversi aspetti delle mostre con un esame del contesto in cui si attestano e la messa a punto di specifici strumenti metodologici d’indagine.

Gli obiettivi della ricerca saranno raggiunti attraverso:
- la mappatura critica delle mostre di architettura realizzate in Italia nel periodo considerato, resa disponibile attraverso una piattaforma web-based, open access, in italiano e inglese;
- l’analisi di casi-studio e temi specifici, divulgata attraverso saggi puntuali.
La ricerca permetterà di:
- offrire un repertorio, il più possibile esaustivo, di mostre di architettura organizzate in Italia dal XIX secolo ad oggi;
- selezionare le mostre a carattere sperimentale, latrici di riflessioni teoriche che abbiano concorso a definire criteri progettuali significativi;
- definire i sistemi narrativi utilizzati per presentare ai pubblici contenuti storico-artistici, progettuali, di restauro, ecc.;
- fornire un quadro storico-critico alle istituzioni e agli architetti impegnati a ridefinire i ruoli affidati alle mostre;
- mettere in luce aspetti critici utili per inquadrare la posizione delle mostre rispetto a tematiche attuali quali: transizione digitale, ecologia e sostenibilità, diritti umani, ecc.;
- creare degli strumenti conoscitivi open source, da implementare anche oltre la durata del PRIN e da intendersi come il primo tassello di una rete di studi intorno al tema delle mostre di architettura con un potenziale sviluppo internazionale.

Text in English:
In recent decades, architecture exhibitions have become the subject of a specific study, as corroborated by the international diffusion of conferences and publications dedicated to this theme. The project Radical Exhibited Thought aims to retrace the history of architecture exhibitions organized in Italy from the second half of the 19th century to the present day, with the purpose of highlighting the quality of the Italian contribution to architecture exhibition-making and its characteristics, very distinct even in the albeit vast European and international panorama. The project focuses in particular on the idea of the exhibition as an essential opportunity to present the radical foundation—here meant as generative moment—of the project of architecture and its cultural, social, political, and economic outcomes. Over the years, architects, artists, critics, and curators produced an extensive corpus of architecture exhibitions. This corpus shows how these exhibitions 1) constitute by themselves, in specific cases, actual manifestos capable of redefining the foundations of the architecture project 2) contribute to expanding the investigation around the concept of space 3) offer places of discussion and production of experimental projects 4) convey new ideas of city and collectivity 5) expose, to the publics, the cultural principles of the architecture project 6) challenge traditional display formats with immersive and multidisciplinary experiences 7) reflect over collateral problematics, such as social and environmental sustainability; circular economy; and social engagement. Given the complexity of the subject, the project resorts to the use of a scientific approach that combines historical analysis of the different aspects of architecture exhibitions with an investigation of the context of their production, and the development of specific methodological tools of analysis.

The project goals are achieved through:
- the critical mapping of the architecture exhibitions produced in Italy over the given time period, made available through an Ministero dell'Università e della Ricerca MUR - BANDO 2022 open-access, web-based platform in Italian and English;
- the in-depth analysis of specific case studies, divulged by the publication of essays.

The research will allow to:
- provide an overview, as thorough as possible, of architecture exhibitions organized in Italy from the 19th century to today;
- focus on experimental exhibitions which present theoretical reflections that contributed to defining significant design criteria;
- identify the narrative methods used to present historical-artistic, design, preservation, etc. contents to the publics; - provide a historical-critical framework to institutions and architects committed to redefining the functions entrusted to exhibitions;
- highlight critical aspects useful for framing the position of architecture exhibitions regarding current issues such as digital turn, sustainability, human rights, etc;
- create open-source knowledge tools, to be updated also beyond the duration of the PRIN, and
intended as the first step of a network of studies on the theme of architecture exhibitions with
potential international development.
