Decree of the Rector n. 1032 of 20/10/2023
Competition for awarding 1 research grant at the University of Udine

DISCLAIMER:
The official and legally binding call for applications is in Italian only.
This document cannot be used for legal purposes and is only meant to provide information in English on the call for applications (Decree of the Rector n. 1032 of 20/10/2023). Please refer to the official call published on: https://www.uniud.it/it/albo-ufficiale

Any change and integration will be made available on the above mentioned web page. Therefore, no personal written communication regarding the examination date and/or competition results shall be provided to applicants.

Annex 1

Competition announcement for the assignment of 1 research grant at the University of Udine, entitled “Influence of anthropic interventions on the morphodynamics of the Marano and Grado Lagoon” SSD: ICAR/01 (principal investigator, Marco Petti)

Art. 1
A selection procedure is hereby launched for the award of 1 research grant at the University of Udine, as identified in Attachment A which constitutes an integral part of the present announcement. The research grant is linked to the research project and is subject and conditioned upon the relative funding. The fellowship may be renewed, in compliance with Art. 22, Law No. 240 of 30 December 2010 (as in the text in force before the implementation of the Conversion Law of the D.L. 36/2022, L. 79/2022), Law No. 11 of 27 February 2015, and the current regulations of the University of Udine for awarding research grants, issued with the Rector’s Decree No. 182 of 31 March 2021. The renewal is subject to the scientific coordinator’s positive assessment of the researcher’s activities, an adequate scientific rationale, and a corresponding financial covering.

The research fellowship does not give rise to any right with regards to accessing University posts.

Any personal communication to candidates related to this selection will be sent exclusively to the email address indicated when registering for the selection, as mentioned in Art. 5.

Art. 2
The research grant described in this competition announcement and the required qualifications to apply for the position are identified in Attachment A. The lack of the admission requirements leads to the automatic exclusion from the competition procedure.

Possession of a PhD or equivalent degree obtained abroad or, only for the interested areas, of a medical specialization accompanied by an adequate scientific production, constitutes a preferential qualification for awarding the research fellowship of this selection, if it has not been provided as a mandatory requirement.

For the only purpose of the admission to the competition, the Examining Board (Art. 7) shall assess the equivalence of the qualification obtained abroad, except for the evaluation of the medical specialization.
qualification to which Article 38 of the Legislative Decree 165/2001 and subsequent modifications and additions, and EU regulations on the matter, shall be applied.

The Examining Board will proceed to the evaluation of the qualification obtained abroad according to the documentation attached to the application form. The Examining Board may exclude the candidate if the submitted documentation does not provide sufficient information for the assessment. Therefore, applicants must enclose all the documentation in their possession relating to their qualification in order to provide the Examining Board with sufficient information for assessment.

Candidates holding a qualification issued by a European Research Area country, if successful, must submit, if not already attached to the application form one of the following options:
- Supplement Diploma in English issued by the competent University.
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the "diplome" service at https://cimea.diplo-me.eu/udine/#/auth/login

Candidates holding a qualification issued by a non-European Research Area country, if successful, must submit, if not already attached to the application form one of the following options:
- Declaration of the on-site value of the qualification and the certificate relating to the degree with examinations and grades. A certificate in a language other than Italian or English must be accompanied by an official translation into one of these languages (certified by the competent diplomatic-consular authority or certified by a court in Italy).
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the "diplome" service at https://cimea.diplo-me.eu/udine/#/auth/login

If the Supplement Diploma or the statement/attestation of comparability are not available when signing the contract, the applicant must demonstrate that he/she has requested the documentation and submit it as soon as possible.

Any exclusion from the selection procedure due to lack of eligibility requirements, absence of required documents, failure to sign the selection application or submission of the selection application in a manner different from what is provided for in this call for applications will be communicated to applicants exclusively at the email address indicated in the application form.

Art. 3

The research grant referred to in this call for applications cannot be awarded:

a. to employees of Universities and the entities referred to in Article 22, section 1, of Italian Law no. 240 of 30 December 2010 (in the text prior to the reform introduced by Law no. 79 of 29 June 2022);

b. to those who have already been awarded research grants pursuant to Italian Law no. 240 of 30 December 2010 (prior to the reform introduced by Law no. 79 of 29 June 2022) for the maximum period provided by law, even if not continuously, excluding the period in which the grant was used in conjunction with the doctorate, up to the legal term of the relative course;

c. to those who have already benefited from research grants and fixed-term researcher contracts provided for, respectively, in Articles 22 and 24 of Italian Law no. 240 of 30 December 2010 (in the text prior to the reform introduced by Law no. 79 of 29 June 2022), for a total of 12 years, even if not consecutive;

d. to anyone who has a degree of kinship or affinity, up to and including the fourth degree, with:
   - the Rector, the Director General or a member of the Board of Directors of the University of Udine;
- the scientific supervisor or a professor/researcher belonging to the department or organisation hosting the research grant in question.

The research grant provided for in this call for applications cannot be combined:
a) with scholarships of any kind, except for those granted by Italian or foreign institutions to supplement, by means of stays abroad, the fellow's training or research activities;
b) with other research grants;
c) with an employment relationship, even if part-time, without prejudice to the relevant provisions for employees of public administrations.

The grant awarded under this call for applications is also incompatible with simultaneous attendance at university degree courses, either Bachelor's degree or Master's degree courses, research Doctorates with scholarships and medical specializations, in Italy or abroad.

Art. 4

Applicants must enclose with their application, under penalty of exclusion, the following documents:
a) their professional scientific CV, highlighting the candidate's aptitude for carrying out and implementing the research project (Attachment A);
b) their identity card, their passport or any other identification document¹;
c) (for candidates with a foreign qualification only) certification or self-certification of both the academic qualification required for the admission to the selection, and of the exams (with evaluation) taken during the period of study abroad, and of any other document that can be useful to the evaluation of the degree by the Examining Board.

Applicants can attach to the application, publications and any other certification considered useful to demonstrate the qualification based on the research program (Attachment A) and to certify any research activity accomplished at public or private institutes (indicating the starting and ending date and the duration).

The documents and qualifications mentioned above must be submitted in Italian or English. Those that are not as requested will not be evaluated. Documents originally written in a language other than Italian or English must come with a translation in Italian or English, that the candidate will do on its own responsibility. The translation can be an abstract concerning the thesis.

Italian and Community candidates wishing to submit qualifications referring to conditions and facts attested by Public Administrations must proceed exclusively with self-certification.
Non-EU citizens legally residing in Italy may self-certify only data that can be verified or certified by Italian public bodies. They may also use declarations in lieu when provided for by an international convention between Italy and the declarant's country of origin.
Non-EU citizens not residing in Italy cannot self-certify.

Only the qualifications possessed by the candidate on the date the application form is submitted and submitted in accordance with the procedures set out in Article 5 will be assessed.

Failure to submit mandatory documents provided for in this article will constitute grounds for exclusion from the selection.

---

¹ Please be aware that the residence permit is not an identification document.
Art. 5

The submission of the applications for the present call starts on October 26, 2023 at 2:00 pm (Italian time) and ends on November 17, 2023 at 2:00 pm (Italian time).

The application to take part in the selection must be completed, under penalty of exclusion, using the appropriate online procedure, available at the link https://pica.cineca.it/

The procedure involves an applicant registration step, for those who do not already have an account, and then an application completion step.

Once completed, the online application must be signed in the manner described in the online procedure (manual signature with attached identity document or digital signature), under penalty of exclusion from selection. The application does not have to be signed if you access the above-mentioned online procedure using your SPID ID.

The qualifications referred to in Article 4 must be attached to the application in .pdf format. Individual .pdf files may not exceed 30MB.

The application for participation in the selection is automatically sent to the University of Udine with the definitive closing of the online procedure.

The University Administration:
- is not responsible if it is impossible to read the submitted documentation in electronic format due to damaged files;
- shall not accept or take into consideration qualifications or documents received in paper form or by any means other than what is specified in this article.

Reference to documents or publications already submitted in connection with other competitions is not allowed.

The Administration is not responsible for any missing document or communication because of inaccurate indication of residence and/or address submitted by the candidate during the application. Also, the Administration is not responsible if the candidate has not communicated changes in this information, or has communicated them too late. The Administration is also not responsible for any postal or telegraphic problems not attributable to the Administration itself.

Applicants are advised not to wait until the last few days before the closing date to submit their application. The University accepts no responsibility for any malfunctions due to technical problems and/or overloading of the communication line and/or application systems.

Art. 6

The selection procedure is held in accordance with the modality indicated in Attachment A.

The test will aim to assess the general preparation, experience and aptitude for research of the candidate. It will consist in the evaluation of the professional scientific curriculum, of the publications and qualifications presented, and of the interview, where foreseen.

Art. 7

The Examining board for the competition is identified in Attachment A of the present competition announcement, of which it is an integral part.
At its first meeting, the Examining board shall appoint its President and Secretary, and establish the criteria and methods for evaluating the qualifications and the interview, where foreseen.

The results of the qualifications assessment must be disclosed to applicants during the interview, where foreseen.

The Examining board can award a maximum of 100 points (one hundred out of one hundred) to the selection.

At the end of the evaluation procedure, the Examining board shall formulate the general merit list based on the overall score of each candidate, and draw up the minutes of the whole competition procedure.

Based on the ranking list, the assignment is awarded to candidates who have obtained a minimum overall score of 70/100 (seventy out of one hundred).

The Examining board's judgement is final.

The ranking list will be made public exclusively through publication on the University's official website.

Applicants will not be notified of the outcome of the evaluation.

Those who do not declare their acceptance of the research grant and do not present themselves at the research centre within the deadline communicated by the latter, even if not formally, shall lose the right to receive it. Exceptions to this term will only be granted in cases of documented force majeure.

Art. 8

The research activity cannot be started before signing the contract defining the terms and conditions of the collaboration.

The activity covered by the research grant must have the following characteristics:

a) it must be carried out as part of the research programme covered by the grant and not be a merely technical support to it;

b) it must have a close connection with the realization of the research program for which the winner of the grant has been awarded the contract;

c) it must be continuous and, in any case, temporally defined, not merely occasional, and in coordination with the overall activity of the University;

d) it must be carried out autonomously, solely within the limits of the programme prepared by the programme supervisor, without predetermined working hours.

The researcher is required to submit a detailed written report on the work carried out and the results achieved, accompanied by the opinion of the scientific supervisor, to the reference organisation at the intervals set out in the contract. The researcher must also submit interim reports and timesheets, if requested by the reference organisation.

Either the fellow or the reference organisation may withdraw from the contract. The reference organisation may terminate the contract not only in the cases referred to in Article 9, sections 2 and 3, of the "Internal rules for awarding research grants pursuant to law 240 of 30 December 2010" of the University of Udine, but also in the event the research project and therefore the financial coverage on which the research grant is based cease to exist.
Art. 9
The following legal dispositions shall apply to the grant referred to in this call for applications:
- for tax matters, the provisions of Article 4 of Italian Law no. 476 of 13 August 1984, as subsequently amended and supplemented;
- for social security matters, the provisions of Article 2(26) et seq. of Italian Law no. 335 of 8 August 1995, as subsequently amended and supplemented;
- for mandatory maternity leave, the provisions of the Italian Ministerial Decree of 12 July 2007;
- with regard to sick leave, the provisions of Article 1(786) of Italian Law no. 296 of 27 December 2006 and subsequent amendments.

During the period of mandatory maternity leave, the allowance paid by INPS according to Art. 5 of the Italian Ministerial Decree of 12 July 2007 is supplemented by the University up to the full amount of the research grant.

The grant will be paid in monthly instalments.

Art. 10
The data collected as part of the procedure referred to in Art. 5 are necessary to properly manage the selection procedure, for any subsequent management of the research grant and for purposes related to managing services provided by the University. The University of Udine is the Data Controller. At any time, the data subject may request access, rectification and, depending on the University's institutional purposes, cancellation and restriction of processing or oppose the processing of their data. The data subject can always lodge a complaint with the Italian Data Protection Authority. The complete disclosure is available on the University of Udine website in the "Privacy" section, accessible from the home page [www.uniud.it](http://www.uniud.it) Direct Link: [https://www.uniud.it/it/pagine-speciali/guida/privacy](https://www.uniud.it/it/pagine-speciali/guida/privacy)

Art. 11
For all matters not expressly mentioned in this call for applications, refer to the regulations in force on the subject cited in the introduction and to the "Internal rules for awarding research grants pursuant to Italian Law no. 240 of 30 December 2010" of the University of Udine, issued by Rector's Decree no. 182 of 31 March 2021.

Art. 12
The procedure supervisor is Dr Sandra Salvador, Head of the Research Services Area of the University of Udine.

The Responsible office at the University of Udine is “Area Servizi per la Ricerca - Ufficio Formazione per la Ricerca”, via Mantica n. 31 - 33100 Udine, Italia.

To request information about the call for applications, please complete the following form available on the University of Udine website:
[https://helpdesk.uniud.it/SubmitSR.jsp?type=req&accountId=universityofudine&populateSR_id=42105](https://helpdesk.uniud.it/SubmitSR.jsp?type=req&accountId=universityofudine&populateSR_id=42105)

Testo in Italiano:
Premessa

Le lagune sono caratterizzate da un equilibrio dinamico, fortemente influenzato dallo scambio idrico che avviene col mare aperto attraverso le cosiddette “bocche lagunari”, aperture del cordone litoraneo che consentono il passaggio d’acqua tra la laguna e il mare. La funzionalità di questo ricircolo può avere ricadute importanti sull’intero ecosistema di questi delicati ambienti di transizione, basti pensare ad esempio al grado di salinità che ne deriva.

Le bocche, assieme ai canali, costituiscono inoltre delle importanti vie di comunicazione e sono quindi una risorsa essenziale per i porti lagunari e per tutte le attività economiche che si avvalgono di esse, quali ad esempio turismo, pesca e industria. Il mantenimento dell’operatività di tali vie richiede continui interventi.

Per quanto riguarda la Laguna di Marano e Grado i principali flussi d’acqua con il mare (detti “prismi di marea”) avvengono attraverso le bocche di Lignano, di Porto Buso e di Grado. Dal 1960-70 sulla bocca di Porto Buso sono stati realizzati interventi importanti per garantire alla zona industriale di Porto Nogaro, situata all’interno del fiume Corno, l’accesso al mare. Risalgono a questo periodo sia un primo approfondimento del canale lagunare che collega la zona industriale al mare che la costruzione di due moli a protezione della bocca. Già questi primi interventi hanno condizionato l’equilibrio morfodinamico lagunare, che, a distanza di 60 anni, oggi possiamo pensare si sia ricostituito.

L’equilibrio morfodinamico di un sistema lagunare è determinato dall’interazione reciproca di maree, correnti da vento e moto ondoso, note con il nome di “forzanti di sistema”. Tutto ciò che comporta un’alterazione dell’equilibrio tra forzanti di sistema e geometria lagunare (ad esempio profondità, superficie, scabrezze, etc.) implica un’alterazione dell’ecosistema lagunare, che è necessario valutare per garantire la sostenibilità ambientale.
Ad esempio, un incremento della profondità dei canali può modificare sensibilmente il campo di correnti, e quindi la dinamica sedimentologica, e il volume d'acqua scambiato fra laguna e mare ad ogni oscillazione di marea (prisma), con conseguenze che possono andare da una mutazione della salinità dei bacini ad una variazione delle dimensioni delle relative bocche.

Alla luce di queste considerazioni nasce l'interesse per uno studio sull'influenza degli interventi antropici sulla morfodinamica delle lagune. Data la complessità del sistema è inevitabile ricorrere ad una modellazione numerica avanzata di tipo morfodinamico, in grado di rappresentare al meglio la generazione del moto ondoso, le correnti da marea e da vento, nonché la complessa interazione fra queste forzanti e la geometria dell'ambiente lagunare. In relazione a quest'interesse, si propone il programma di ricerca di seguito descritto.

Obiettivi e sviluppo del programma di ricerca

Individuazione di un bacino tipo sul quale analizzare le conseguenze morfodinamiche di un cambiamento di profondità del canale principale e di aree localizzate nonché di una modifica della bocca di accesso e del canale a mare. Per raggiungere questo obiettivo è richiesta:

- un’approfondita analisi bibliografica;
- un’indagine sull’evoluzione storica del bacino;
- una ricerca capillare dei dati necessari alla definizione delle forzanti di sistema;
- la definizione di un modello matematico e numerico in grado di analizzare l’interazione delle forzanti di sistema fra di esse e col fondo;
- tutte le indagini (simulazioni) necessarie per comprendere le mutazioni morfologiche conseguenti ad una serie di interventi antropici opportunamente definiti.

Text in English:

Preamble

The lagoons are characterized by a dynamic balance, strongly affected by the water exchange that occurs with the open sea through the so-called "lagoon inlets", which are openings in the offshore bar that allow the passage of water between the lagoon and the sea. The efficiency of this recirculation can have significant consequences on the entire ecosystem of these delicate transition environments, just think for example of the salinity that derives from it.

The inlets, together with the canals, also constitute important transport routes and are therefore an essential resource for the lagoon ports and for all the economic activities involved with them, such as tourism, fishing and industry. The main channels require periodic maintenance works to ensure a minimum water depth.

As for the Marano and Grado Lagoons, the main water flows with the sea (called "tidal prisms") occur through the mouths of Lignano, Porto Buso and Grado. From 1960-70, important interventions were carried out on the Porto Buso inlet to ensure an outlet to the sea for the industrial area of Porto Nogaro, which is located within the Cono river. Both, a first deepening of the lagoon channel that connects the industrial area to the sea and the construction of two piers to protect the inlet date back to this period. These first interventions have affected the morphodynamic equilibrium of the lagoon; today, after 60 years, we can consider this morphodynamic equilibrium as reconstituted.

The morphodynamic equilibrium of a lagoon system is determined by the mutual interaction of tides, wind currents and wave motion, which are known as "system forcings". Anything that involves an alteration of the balance between system forcings and lagoon geometry (for example depth, surface, roughness, etc.) implies an alteration of the lagoon ecosystem, which must be assessed to ensure environmental sustainability.

For example, an increase in the depth of the channels can significantly change the current field, and therefore the sedimentological dynamics, and the volume of water exchanged between the lagoon and the sea at each tidal oscillation (prism), with consequences that can range from a change in the salinity of the basins to a change in the size of their mouths.
In the light of these considerations, interest arises for a study on the influence of anthropogenic interventions on the morphodynamics of the lagoons. The complexity of the system inevitably requires an advanced morphodynamic numerical modeling, able to best represent the generation of wave motion, tidal and wind currents, as well as the complex interaction between these forcings and the geometry of the lagoon. In relation to this interest, the research program described below is proposed.

Objectives and development of the research programme

Identification of a typical basin on which the morphodynamic consequences will be analyzed of a change in depth of the main channel and of localized areas as well as of a modification of the tidal inlet and of the sea channel. The application must include:

- an in-depth bibliographic research;
- a survey on the historical evolution of the basin;
- a detailed research of the data necessary for the definition of the system forcings;
- the definition of a mathematical and numerical model suitable to analyze the interaction of the system forcings among themselves and with the bottom;
- all the investigations (simulations) necessary to understand the morphological changes resulting from appropriately defined anthropic interventions.

Struttura dell’Università di Udine presso la quale verrà sviluppata l’attività di ricerca / Department or other structure of the University of Udine where research activities will be carried out:

Dipartimento Politecnico di Ingegneria e Architettura (DPIA) / Polytechnic Department of Engineering and Architecture

Importo dell’assegno di ricerca (al lordo oneri carico assegnista) / Total grant gross for the research fellowship:

€ 20,267,00

Durata dell’assegno di ricerca / Duration of the research fellowship “assegno di ricerca”:

12 mesi / months

Finanziamento / Financed by:

La copertura finanziaria graverà sul progetto / fondo: AR22_030 ACCORDO OPERATIVO REGIONE FVG. CUP: D94H22000660008.

Requisiti di ammissione / Minimum qualifications necessary:

- Possesso di un diploma di laurea vecchio ordinamento (ante decreto 3 novembre 1999 n. 509) o di laurea specialistica/magistrale (ex decreto 3 novembre 1999 n. 509 e decreto 22 ottobre 2004 n. 270) o titolo equivalente conseguito all’estero;
- possesso di un curriculum scientifico professionale idoneo allo svolgimento dell’attività di ricerca contemplata.
- University degree obtained before Decree n. 509 of 3 November 1999 or specialistic/Master’s degree (post decree n. 509 of 3 November 1999 and decree n. 270 of 22 October 2004) or equivalent degree obtained abroad;
- professional scientific curriculum suitable for the research activity above mentioned.
Procedura selettiva / Competition procedure:

Valutazione per titoli e colloquio / Evaluation of titles and oral exam.

I risultati della valutazione dei titoli saranno resi noti agli interessati nel corso del colloquio / The evaluation of the qualifications will be disclosed to candidates during the interview.
