Decree of the Rector n. 1132 of 06/11/2023
Competition for awarding 1 research grant at the University of Udine

DISCLAIMER:
The official and legally binding call for applications is in Italian only. This document cannot be used for legal purposes and is only meant to provide information in English on the call for applications (Decree of the Rector n. 1132 of 06/11/2023). Please refer to the official call published on: https://www.uniud.it/it/albo-ufficiale

Any change and integration will be made available on the above mentioned web page. Therefore, no personal written communication regarding the examination date and/or competition results shall be provided to applicants.

Annex 1

Competition announcement for the assignment of 1 research grant at the University of Udine, entitled “Epidemiological studies and biocontrol of Cadophora luteo-olivacea, agent of kiwifruit skin-pitting” SSD: AGR/12 (principal investigator, Paolo Ermacora)

Art. 1
A selection procedure is hereby launched for the award of 1 research grant at the University of Udine, as identified in Attachment A which constitutes an integral part of the present announcement. The research grant is linked to the research project and is subject and conditioned upon the relative funding. The fellowship may be renewed, in compliance with Art. 22, Law No. 240 of 30 December 2010 (as in the text in force before the implementation of the Conversion Law of the D.L. 36/2022, L. 79/2022), Law No. 11 of 27 February 2015, and the current regulations of the University of Udine for awarding research grants, issued with the Rector’s Decree No. 182 of 31 March 2021. The renewal is subject to the scientific coordinator’s positive assessment of the researcher’s activities, an adequate scientific rationale, and a corresponding financial covering.

The research fellowship does not give rise to any right with regards to accessing University posts.

Any personal communication to candidates related to this selection will be sent exclusively to the email address indicated when registering for the selection, as mentioned in Art. 5.

Art. 2
The research grant described in this competition announcement and the required qualifications to apply for the position are identified in Attachment A. The lack of the admission requirements leads to the automatic exclusion from the competition procedure.

Possession of a PhD or equivalent degree obtained abroad or, only for the interested areas, of a medical specialization accompanied by an adequate scientific production, constitutes a preferential qualification for awarding the research fellowship of this selection, if it has not been provided as a mandatory requirement.

For the only purpose of the admission to the competition, the Examining Board (Art. 7) shall assess the equivalence of the qualification obtained abroad, except for the evaluation of the medical specialization...
qualification to which Article 38 of the Legislative Decree 165/2001 and subsequent modifications and additions, and EU regulations on the matter, shall be applied.

The Examining Board will proceed to the evaluation of the qualification obtained abroad according to the documentation attached to the application form. The Examining Board may exclude the candidate if the submitted documentation does not provide sufficient information for the assessment. Therefore, applicants must enclose all the documentation in their possession relating to their qualification in order to provide the Examining Board with sufficient information for assessment.

Candidates holding a qualification issued by a European Research Area country, if successful, must submit, if not already attached to the application form one of the following options:
- Supplement Diploma in English issued by the competent University.
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the "diplome" service at https://cimea.dipolme.eu/udine/#/auth/login

Candidates holding a qualification issued by a non-European Research Area country, if successful, must submit, if not already attached to the application form one of the following options:
- Declaration of the on-site value of the qualification and the certificate relating to the degree with examinations and grades. A certificate in a language other than Italian or English must be accompanied by an official translation into one of these languages (certified by the competent diplomatic-consular authority or certified by a court in Italy).
- CIMEA Certificate of comparability of the foreign qualification, issued by CIMEA (Information Centre on Academic Mobility and Equivalence) via the "diplome" service at https://cimea.dipolme.eu/udine/#/auth/login

If the Supplement Diploma or the statement/attestation of comparability are not available when signing the contract, the applicant must demonstrate that he/she has requested the documentation and submit it as soon as possible.

Any exclusion from the selection procedure due to lack of eligibility requirements, absence of required documents, failure to sign the selection application or submission of the selection application in a manner different from what is provided for in this call for applications will be communicated to applicants exclusively at the email address indicated in the application form.

Art. 3

The research grant referred to in this call for applications cannot be awarded:

a. to employees of Universities and the entities referred to in Article 22, section 1, of Italian Law no. 240 of 30 December 2010 (in the text prior to the reform introduced by Law no. 79 of 29 June 2022);

b. to those who have already been awarded research grants pursuant to Italian Law no. 240 of 30 December 2010 (prior to the reform introduced by Law no. 79 of 29 June 2022) for the maximum period provided by law, even if not continuously, excluding the period in which the grant was used in conjunction with the doctorate, up to the legal term of the relative course;

c. to those who have already benefited from research grants and fixed-term researcher contracts provided for, respectively, in Articles 22 and 24 of Italian Law no. 240 of 30 December 2010 (in the text prior to the reform introduced by Law no. 79 of 29 June 2022), for a total of 12 years, even if not consecutive;

d. to anyone who has a degree of kinship or affinity, up to and including the fourth degree, with:
   - the Rector, the Director General or a member of the Board of Directors of the University of Udine;
- the scientific supervisor or a professor/researcher belonging to the department or organisation hosting the research grant in question.

The research grant provided for in this call for applications cannot be combined:
a) with scholarships of any kind, except for those granted by Italian or foreign institutions to supplement, by means of stays abroad, the fellow's training or research activities;
b) with other research grants;
c) with an employment relationship, even if part-time, without prejudice to the relevant provisions for employees of public administrations.

The grant awarded under this call for applications is also incompatible with simultaneous attendance at university degree courses, either Bachelor's degree or Master's degree courses, research Doctorates with scholarships and medical specializations, in Italy or abroad.

Art. 4

Applicants must enclose with their application, under penalty of exclusion, the following documents:
a) their professional scientific CV, highlighting the candidate's aptitude for carrying out and implementing the research project (Attachment A);
b) their identity card, their passport or any other identification document¹;
c) (for candidates with a foreign qualification only) certification or self-certification of both the academic qualification required for the admission to the selection, and of the exams (with evaluation) took during the period of study abroad, and of any other document that can be useful to the evaluation of the degree by the Examining Board.

Applicants can attach to the application, publications and any other certification considered useful to demonstrate the qualification based on the research program (Attachment A) and to certify any research activity accomplished at public or private institutes (indicating the starting and ending date and the duration).

The documents and qualifications mentioned above must be submitted in Italian or English. Those that are not as requested will not be evaluated. Documents originally written in a language other than Italian or English must come with a translation in Italian or English, that the candidate will do on its own responsibility. The translation can be an abstract concerning the thesis.

Italian and Community candidates wishing to submit qualifications referring to conditions and facts attested by Public Administrations must proceed exclusively with self-certification.

Non-EU citizens legally residing in Italy may self-certify only data that can be verified or certified by Italian public bodies. They may also use declarations in lieu when provided for by an international convention between Italy and the declarant's country of origin.

Non-EU citizens not residing in Italy cannot self-certify.

Only the qualifications possessed by the candidate on the date the application form is submitted and submitted in accordance with the procedures set out in Article 5 will be assessed.

Failure to submit mandatory documents provided for in this article will constitute grounds for exclusion from the selection.

¹ Please be aware that the residence permit is not an identification document.
Art. 5
The submission of the applications for the present call starts on November 9, 2023 at 2:00 pm (Italian time) and ends on November 28, 2023 at 2:00 pm (Italian time).

The application to take part in the selection must be completed, under penalty of exclusion, using the appropriate online procedure, available at the link [https://pica.cineca.it](https://pica.cineca.it).

The procedure involves an applicant registration step, for those who do not already have an account, and then an application completion step.

Once completed, the online application must be signed in the manner described in the online procedure (manual signature with attached identity document or digital signature), under penalty of exclusion from selection. The application does not have to be signed if you access the above-mentioned online procedure using your SPID ID.

The qualifications referred to in Article 4 must be attached to the application in .pdf format. Individual .pdf files may not exceed 30MB.

The application for participation in the selection is automatically sent to the University of Udine with the definitive closing of the online procedure.

The University Administration:
- is not responsible if it is impossible to read the submitted documentation in electronic format due to damaged files;
- shall not accept or take into consideration qualifications or documents received in paper form or by any means other than what is specified in this article.

Reference to documents or publications already submitted in connection with other competitions is not allowed.

The Administration is not responsible for any missing document or communication because of inaccurate indication of residence and/or address submitted by the candidate during the application. Also, the Administration is not responsible if the candidate has not communicated changes in this information, or has communicated them too late. The Administration is also not responsible for any postal or telegraphic problems not attributable to the Administration itself.

Applicants are advised not to wait until the last few days before the closing date to submit their application. The University accepts no responsibility for any malfunctions due to technical problems and/or overloading of the communication line and/or application systems.

Art. 6
The selection procedure is held in accordance with the modality indicated in Attachment A.

The test will aim to assess the general preparation, experience and aptitude for research of the candidate. It will consist in the evaluation of the professional scientific curriculum, of the publications and qualifications presented, and of the interview, where foreseen.

Art. 7
The Examining board for the competition is identified in Attachment A of the present competition announcement, of which it is an integral part.
At its first meeting, the Examining board shall appoint its President and Secretary, and establish the criteria and methods for evaluating the qualifications and the interview, where foreseen.

The results of the qualifications assessment must be disclosed to applicants during the interview, where foreseen.

The Examining board can award a maximum of 100 points (one hundred out of one hundred) to the selection.

At the end of the evaluation procedure, the Examining board shall formulate the general merit list based on the overall score of each candidate, and draw up the minutes of the whole competition procedure.

Based on the ranking list, the assignment is awarded to candidates who have obtained a minimum overall score of 70/100 (seventy out of one hundred).

The Examining board's judgement is final.

The ranking list will be made public exclusively through publication on the University's official website.

Applicants will not be notified of the outcome of the evaluation.

Those who do not declare their acceptance of the research grant and do not present themselves at the research centre within the deadline communicated by the latter, even if not formally, shall lose the right to receive it. Exceptions to this term will only be granted in cases of documented force majeure.

Art. 8

The research activity cannot be started before signing the contract defining the terms and conditions of the collaboration.

The activity covered by the research grant must have the following characteristics:

a) it must be carried out as part of the research programme covered by the grant and not be a merely technical support to it;

b) it must have a close connection with the realization of the research program for which the winner of the grant has been awarded the contract;

c) it must be continuous and, in any case, temporally defined, not merely occasional, and in coordination with the overall activity of the University;

d) it must be carried out autonomously, solely within the limits of the programme prepared by the programme supervisor, without predetermined working hours.

The researcher is required to submit a detailed written report on the work carried out and the results achieved, accompanied by the opinion of the scientific supervisor, to the reference organisation at the intervals set out in the contract. The researcher must also submit interim reports and timesheets, if requested by the reference organisation.

Either the fellow or the reference organisation may withdraw from the contract.

The reference organisation may terminate the contract not only in the cases referred to in Article 9, sections 2 and 3, of the "Internal rules for awarding research grants pursuant to law 240 of 30 December 2010" of the University of Udine, but also in the event the research project and therefore the financial coverage on which the research grant is based cease to exist.
Art. 9
The following legal dispositions shall apply to the grant referred to in this call for applications:
- for tax matters, the provisions of Article 4 of Italian Law no. 476 of 13 August 1984, as subsequently amended and supplemented;
- for social security matters, the provisions of Article 2(26) et seq. of Italian Law no. 335 of 8 August 1995, as subsequently amended and supplemented;
- for mandatory maternity leave, the provisions of the Italian Ministerial Decree of 12 July 2007;
- with regard to sick leave, the provisions of Article 1(788) of Italian Law no. 296 of 27 December 2006 and subsequent amendments.

During the period of mandatory maternity leave, the allowance paid by INPS according to Art. 5 of the Italian Ministerial Decree of 12 July 2007 is supplemented by the University up to the full amount of the research grant.

The grant will be paid in monthly instalments.

Art. 10
The data collected as part of the procedure referred to in Art. 5 are necessary to properly manage the selection procedure, for any subsequent management of the research grant and for purposes related to managing services provided by the University. The University of Udine is the Data Controller. At any time, the data subject may request access, rectification and, depending on the University's institutional purposes, cancellation and restriction of processing or oppose the processing of their data. The data subject can always lodge a complaint with the Italian Data Protection Authority. The complete disclosure is available on the University of Udine website in the "Privacy" section, accessible from the home page [www.uniud.it](http://www.uniud.it) Direct Link: [https://www.uniud.it/it/pagine-speciali/guida/privacy](https://www.uniud.it/it/pagine-speciali/guida/privacy)

Art. 11
For all matters not expressly mentioned in this call for applications, refer to the regulations in force on the subject cited in the introduction and to the "Internal rules for awarding research grants pursuant to Italian Law no. 240 of 30 December 2010" of the University of Udine, issued by Rector's Decree no. 182 of 31 March 2021.

Art. 12
The procedure supervisor is Dr Sandra Salvador, Head of the Research Services Area of the University of Udine.

The Responsible office at the University of Udine is "Area Servizi per la Ricerca - Ufficio Formazione per la Ricerca", via Mantica n. 31 - 33100 Udine, Italia.

To request information about the call for applications, please complete the following form available on the University of Udine website:
[https://helpdesk.uniud.it/SubmitSR.jsp?type=req&accountId=universityofudine&populateSR_id=42105](https://helpdesk.uniud.it/SubmitSR.jsp?type=req&accountId=universityofudine&populateSR_id=42105)
Responsabile scientifico della ricerca / Principal investigator:

Titolo dell’assegno di ricerca / Topic of the research fellowship “assegno di ricerca”:

Testo in italiano:
Studi su epidemiologia e biocontrollo di Cadophora luteo-olivacea, agente dello skin-pitting del kiwi.

Text in English:
Epidemiological studies and biocontrol of Cadophora luteo-olivacea, agent of kiwifruit skin-pitting.

Obiettivi previsti e risultati attesi del programma di ricerca in cui si colloca l’attività dell’assegnista di ricerca / Foreseen objectives and results of the research programme performed by the research fellow “assegno di ricerca”:

Testo in italiano:
La coltura dell’actinidia nella regione Friuli Venezia Giulia, oltre che legata ad una tradizione importante, rappresenta una forte potenzialità nell’ambito della produzione frutticola. In particolare, il settore sta positivamente reagendo alle gravi avversità che negli ultimi anni lo hanno colpito (cancro batterico, moria, cimice asiatica) e diversi sono i nuovi impianti messi a dimora, in molti casi anche con forti investimenti in termini di tecnologie (teli di copertura, nuove varietà, gestione automatizzata dell’irrigazione ecc.). I prezzi di mercato del kiwi sono molto interessanti e per puntare alla massima remunerazione possibile è necessario che il prodotto sia idoneo a lunghi periodi di frigoconservazione al fine di rendere possibile la sua ottimale coltura. Tra le problematiche più importanti che si possono presentare nel corso della conservazione a basse temperature, quelle dovute all’azione di agenti patogeni, Cadophora luteo-olivacea in particolare, sono quelle che destano maggiore preoccupazione tra gli addetti ai lavori. Cadophora luteo-olivacea è l’agente dello skin-pitting del kiwi, avversità che si manifesta in maniera irregolare ed in alcuni casi con grave incidenza in molti areali italiani di produzione del kiwi (Di Lenarda et al., 2009; Spadaro et al., 2010). Attualmente, le conoscenze epidemiologiche sullo skin-pitting del kiwi sono ancora incomplete e di conseguenza le strategie di lotta risultano spesso inefficaci.

Il Dipartimento di Scienze Agroalimentari, Ambientali e Animali (DI4A) dell’Università degli Studi di Udine lavora da oltre un decennio sullo skin-pitting dell’actinidia in Friuli Venezia Giulia, in un primo momento per stabilirne le cause, ed in seguito per la messa a punto di sistemi diagnostici e modalità di lotta basate sull’utilizzo di agenti di biocontrollo (Di Lenarda et al., 2011; Di Francesco et al., 2023). Le attività previste nel presente assegno di ricerca si inseriscono nell’ambito di una convenzione di ricerca con ERSA riguardante anche lo studio di Cadophora luteo-olivacea.

Nel corso della stagione vegetativa 2024 si procederà al monitoraggio, mediante captaspore volumetrico tipo Burkard (Van der Heyden et al., 2021), della presenza di spore di C. luteo-olivacea in un impianto di actinidia cv Hayward, storicamente molto colpito dalla problematica dello skin-pitting. Ad
intervalli settimanali i campioni verranno prelevati dal captaspor e saranno sottoposti ad analisi molecolare mediate tecniche quantitative (Real-time PCR) per determinare e quantificare la presenza di *C. luteo-olivacea*. Le analisi quantitative saranno condotte con protocolli già presenti in letteratura (Maldonado-Gonzales et al., 2020) o messi a punto in maniera specifica se le esigenze della presente ricerca lo rendessero necessario.

I risultati delle analisi di tipo quantitativo verranno correlati anche con l’andamento meteorologico (temperatura, precipitazioni) rilevato da centraline poste nelle vicinanze dell'impianto e con le fasi fenologiche di sviluppo della coltura. L'analisi dei risultati quantitativi sulla presenza del patogeno e dell’andamento meteorologico forniranno indicazioni sui momenti di presenza nell’ambiente di propaguli del fungo e quindi potranno essere la base per indicazioni mirate riguardo le strategie di lotta.

Nel corso della stagione 2024, all’interno dell’azienda sperimentale verranno anche effettuate prove di controllo dello skin-pitting privilegiando l’utilizzo di biocompetitori. L’utilizzo di agenti di biocontrollo viene privilegiato in considerazione delle potenzialità offerte da questo approccio e della necessità di riduzione degli input chimici, in accordo con le indicazioni comunitarie sulla riduzione dell’utilizzo di fitofarmaci. In particolare, in funzione di evidenze bibliografiche per patosistemi simili saranno effettuate applicazioni di campo di organismi di biocontrollo (es. *Bacillus pumilus*, *Bacillus amyloliquefaciens*) e sarà in seguito valutata, rispetto al non trattato, l’insorgenza di skin-pitting durante la fase di frigoconservazione.

Le attività su *C. luteo-olivacea* consentiranno di migliorare le conoscenze epidemiologiche su una malattia importante ma ancor poco conosciuta, inoltre, la disponibilità di strumenti diagnosticici molecolari migliorerà il monitoraggio di *C. luteo-olivacea* nei frutteti. Gli studi sugli agenti di biocontrollo forniranno un quadro dei potenziali agenti di biocontrollo in grado di prevenire l’insorgenza o attenuare la gravità dello skin-pitting del kiwi.

**Bibliografia:**

**Text in English:**

The cultivation of kiwifruit in the Friuli Venezia Giulia region represents a consolidated tradition, but also a strong potential in the field of fruit production. In particular, the sector is countering positively to the serious adversities that have affected it in recent years (bacterial cancker, "moria", *Halyomorpha halys*) and several new orchards have been planted, in several cases with heavy investments in terms of technologies (hail nets and rain protection sheets, new varieties, automated irrigation management strategies, etc.). Kiwifruit market prices are very interesting and to obtain the maximum possible remuneration it is necessary that the product is suitable for long periods of postharvest cold storage in order to make its optimal market placement possible. Among the most important problems that can arise during storage at low temperatures, those due to the presence of pathogens, mainly *Cadophora luteo-olivacea*, are those that cause the greatest concern among operators. *Cadophora luteo-olivacea* is the agent of kiwifruit skin-pitting, an adversity that occurs irregularly and in some cases with serious incidence in many Italian kiwi production areas (Di Lenarda et al., 2009; Spadaro et al., 2010).
Currently, epidemiological knowledge on kiwi skin-pitting is still incomplete and consequently control strategies are often ineffective. The Department of Agricultural, Food, Environmental and Animal Sciences (DI4A) of the University of Udine has been working for over a decade on the skin-pitting of kiwifruit in Friuli Venezia Giulia, initially to establish aetiology, and later for the development of diagnostic tools and management methods based on the use of biocontrol agents (Di Lenarda et al., 2011; Di Francesco et al., 2023). The activities proposed in this research grant are part of a research agreement with ERSA also concerning the study of Cadophora luteo-olivacea.

During the 2024 growing season, the presence of C. luteo-olivacea spores will be monitored using Burkard-type volumetric captaspores (Van der Heyden et al., 2021) in a kiwifruit orchard cv Hayward, historically heavily affected by the skin-pitting disease. At weekly intervals, samples will be taken from the trap and subjected to molecular analysis using quantitative techniques (Real-time PCR) to determine and quantify the presence of C. luteo-olivacea. The quantitative analyzes will be conducted with protocols already present in the literature (Maldonado-Gonzales et al., 2020) or newly developed according to specific needs. The results of the quantitative analyses will also be correlated with the meteorological data (temperature, precipitation) detected by data loggers located near the orchard and with the phenological phases of the crop. The analysis of the quantitative results on the presence of the pathogen and of the meteorological trend will provide indications on the times of greatest presence of airborne spores of the pathogen and therefore could indicate targeted control strategies. During the 2024 season, skin-pitting management protocols will also be set up, mainly based on the use of biocontrol agents. The use of BCAs is preferred in consideration of the potential offered by this approach and the need to reduce chemical inputs, in accordance with European community directives on reducing the use of pesticides. In particular, based on bibliographic evidence for similar pathosystems, field applications of BCAs (e.g., Bacillus pumilus, Bacillus amyloliquefaciens) will be carried out and the onset of skin-pitting will then be evaluated during the cold storage.

The activities on C. luteo-olivacea will allow us to improve epidemiological knowledge on an important but still little-known disease; furthermore, the availability of molecular diagnostic tools will improve the monitoring of C. luteo-olivacea in orchards. Studies on biocontrol agents will provide insight into potential biocontrol agents that can prevent the onset or mitigate the severity of kiwifruit skin-pitting.
