Annex 1

Call for applications for the award of 1 grant for the performance of research activities at the University of Udine on the topic "Promotion of diversified Adriatic mariculture by marketing evaluations and transferability models" SSD: AGRI-01/A (principal investigator, Federico Nassivera)

Art. 1
A selection proceeding is hereby announced for the award of 1 research grant at the University of Udine for the performance of the research activity identified in Annex A, which forms an integral and substantial part of this call. The research grant is linked to the research project on which it is based and is subject to the corresponding financial coverage.

The grant may be renewed with the winner in accordance with the provisions of Article 22 of Law no. 240 of 30 December 2010 (in the text prior to Leg. Decree no. 36 of 30 April 2022, converted with amendments by Law no. 79 of 29 June 2022) and the Regulations of the University of Udine for the awarding of research grants issued by Rector's Decree no. 182 of 31 March 2021, in the presence of a positive assessment by the scientific supervisor of the activity carried out by the research fellow, adequate scientific justification and related financial coverage, within the limits set out in Article 3, letters b) and c) below.

The research grant does not entitle the successful candidate to any rights as regards access to University roles.

Any personal communication to candidates relating to this selection will be sent exclusively to the email address indicated in the application form.

Art. 2
The activities covered by the research grant referred to in this call for competition and the admission requirements are indicated and described in Annex A. Failure to meet the admission requirements at the time of applying shall result in the exclusion of the candidate from the selection process.
Possession of a PhD qualification or equivalent qualification obtained abroad or, for the sectors concerned only, of a medical specialisation qualification accompanied by an adequate scientific production, constitutes a preferential requirement for the awarding of the grant envisaged for this selection, if it has not been mentioned as an admission requirement.

The Selection Board shall assess, for the sole purpose of admission to the competition, the suitability of any qualification obtained abroad, without prejudice to the assessment of the medical specialisation qualification to which Article 38, paragraph 3.1 of Legislative Decree 165/2001, as amended, and the relevant Community regulations apply.

The Board assesses the qualification obtained abroad based on the relevant documentation enclosed with the application to take part in the selection and may exclude the candidate if the submitted documentation does not provide sufficient elements for the assessment. Candidates are therefore invited to enclose all documentation in their possession relating to their qualifications in order to provide the Board with sufficient elements to assess their position.

Candidates are admitted to the selection process subject to a reservation and their exclusion, for failure to meet the requirements, may be ordered at any time by reasoned decision.

Art. 3
The research grant referred to in this call cannot be awarded to the following subjects:

a) Employees of Universities and the entities referred to in Article 22(1) of Law no. 240 of 30 December 2010 (in the text prior to Leg. Decree no. 36 of 30 April 2022, converted with amendments by Law no. 79 of 29 June 2022).

b) Recipients of previous research grants pursuant to Law no. 240 of 30 December 2010, for the maximum period allowed by the regulations, excluding the period in which the grant was received in conjunction with a PhD, up to the legal duration of the relevant course.

c) Those who have already been awarded research grants and fixed-term researcher contracts pursuant to Law no. 240 of 30 December 2010 for a total of 12 years, even if not consecutive.

d) Those who have a degree of kinship or relationship, up to and including the fourth degree, with:
   - The Rector, the Director General or a member of the Board of Directors of the University of Udine.
   - The principal investigator or a professor/researcher belonging to the department or structure of interest where the research grant activity takes place.

The research grant referred to in this call cannot be cumulated with the following:

a) Awarded scholarships of any kind, except those granted by national or foreign institutions useful for supplementing, by means of stays abroad, the fellow's training or research activities.

b) Other research grants.

c) Employment relationships, even if part-time, without prejudice to the provisions of the regulations for employees of public administrations.

The grant referred to in this call is also incompatible with simultaneous attendance of degree courses, master's degrees, and PhDs with scholarships and medical specialisation, in Italy and abroad.
Persons who have been convicted of a criminal offence resulting in disqualification from holding public office or inability to contract with the public administration as a secondary penalty are not eligible for selection.

Art. 4
Applicants must submit, in the manner described in Article 5 below, the application to take part in the selection, duly signed in handwritten or digital form. An application without a signature will result in the exclusion of the candidate, except in the case of access through the use of the Public Digital Identity System (SPID) in which case the signature will not be necessary.

The application must be uploaded in its entirety (i.e., every page), otherwise the applicant will be excluded from the selection.

Applicants must enclose the following with their application for participation in the selection, under penalty of exclusion:

1. The professional scientific curriculum vitae in Italian or English or one of the additional languages, if any, indicated in Annex A, highlighting the candidate's aptitude for carrying out and implementing the research programme.
2. Copy of valid identity document or other identification document. Citizens of non-EU countries must enclose a copy of their passport.
3. Limited to citizens of non-EU states residing or authorised to reside in Italy, a copy of their residence permit or authorisation to reside in Italy.
4. For candidates who cannot provide a self-certification under the conditions set out below, documentation proving possession of the academic qualification required for admission to the selection. Possession of a higher academic qualification does not exempt the candidate from producing such documentation, which, if missing, will result in exclusion:

- **Candidates who are Italian citizens or citizens of a European Union Member State** must submit a declaration in lieu of certification and, if necessary, a notarial deed regarding the academic qualification needed for admission (indicating the academic qualification, the academic institution awarding the qualification, the year it was awarded and the mark obtained) and the publications and other qualifications held, indicating for each one all the identification details necessary for the Board's assessment. The application for participation counts as a declaration in lieu of certification of the declared academic qualification. If the subject matter of the declaration is not clearly identified in terms of its nature, duration, time setting and institution concerned, the selection board will disregard it. The Administration reserves the right to carry out appropriate checks on the truthfulness of the content of the declarations made; in the event of a false declaration, the provisions of Article 76 of Presidential Decree no. 445/2000 and Articles 483, 485, and 486 of the Italian Criminal Code shall apply. The University will not take into account any certificates attached by candidates who are Italian citizens or citizens of a state belonging to the European Union.

- **Citizens of a non-European Union State** must submit documents and qualifications in Italian or English or one of the additional languages, if any, indicated in Annex A, under penalty of exclusion from the selection or, as the case may be, non-assessment.

Documents and titles, originally in a different language, must be accompanied by a translation, made by the candidate under his or her responsibility, into Italian or English or any other language indicated in Appendix A. With reference to the dissertation only, the translation may be limited to an extended abstract.

- **Citizens of a non-EU State regularly residing in Italy** may use declarations in lieu of certification only in respect of states, personal qualities or facts that can be certified or attested to by Italian public bodies,
without prejudice to the special provisions contained in the laws and regulations governing immigration and the status of foreigners.

- **Citizens of non-EU states authorised to reside in Italy** may use the aforementioned declarations in cases where they are produced pursuant to international conventions between Italy and the declarant's country of origin.

Applicants may also enclose with their application for assessment purposes their publications and any other qualification deemed useful to prove their qualification in relation to the research programme described in Annex A and to certify any research activity carried out in public and/or private entities (with the indication of the starting date and duration). The submission modalities are similar to those indicated in point 4 of the previous paragraph.

Only the qualifications possessed by the candidate on the date of submission of the application for selection and presented in accordance with Article 5 will be assessed.

Any exclusion from the selection procedure due to lack of eligibility requirements, absence of mandatory documents, failure to sign the application to take part in the selection or submission of the application in a manner other than that provided for in this call will be communicated to the parties concerned exclusively by email to the email address indicated in the application to take part in the selection.

**Art. 5**

Registration for this selection will begin on August 9, 2024 at 2:00 pm (Italian time) and will end on September 3, 2024 at 2:00 pm (Italian time).

The application to take part in the selection must be completed, under penalty of exclusion, using the appropriate online procedure, available at [https://pica.cineca.it/](https://pica.cineca.it/).

For those who do not already have a user account, the procedure involves a registration phase for the applicant, and a subsequent phase for completing the application online.

Once completed, the application must be signed in the manner (handwritten signature, with attached identity document, or digital signature) described in the online procedure, under penalty of exclusion from the selection. The application does not have to be signed if the above-mentioned online procedure is accessed using the Sistema Pubblico di Identità Digitale (SPID - Digital ID Public System). In the case of a handwritten signature, the applicant must upload the application to the system in its entirety. The information entered in the application form shall constitute a declaration in lieu of certification and affidavit, pursuant to Articles 46 and 47 of Presidential Decree no. 445/2000.

The qualifications referred to in Article 4 must be attached to the application in .pdf format. Individual files, in .pdf format, may not exceed 30MB in size. It is not permitted to submit attachments to the application in the form of links to files residing on "online storage/file sharing" services or web pages. Reference may not be made to documents or publications submitted to this or other administrations or documents attached to the application for participation in another selection procedure.
The application for participation in the selection is automatically sent to the University of Udine with the final closure of the online procedure.

The University Administration:
- accepts no liability if it is impossible to read the submitted documentation in electronic format due to damaged files;
- does not accept or take into consideration qualifications or documents received in paper form or by any other means than those specified in this article.

The Administration accepts no liability in the event of incorrect indication by the candidate of his/her email address or in the event of failure or delay in communicating a change in the email address indicated in the application, nor for any digital transmission errors attributable to third parties, unforeseeable circumstances or force majeure.

Applicants are advised not to wait until the last few days before the deadline to submit their application. The University accepts no liability for any malfunctions due to technical problems and/or overloading of the communication line and/or application systems.

Art. 6
The selection test takes place according to the modalities set out in Annex A.

The test will aim to ascertain the candidates' preparation, experience and research aptitude. It will consist of an assessment of the professional scientific curriculum, publications and titles submitted, and an interview, where applicable.

Failure of the candidate to attend the interview will be considered as withdrawal from the selection, whatever the cause.

Candidates who intend to avail themselves of the benefits provided for by Article 20 of Law no. 104 of 1992 (need for assistance, possible use of additional time for the performance of examination tests) in relation to their disability situation, must declare this and accompany the application with appropriate medical certification in order to allow the Administration to prepare in time the means and tools to guarantee the statutory benefits; failure to submit the medical certification exempts the Administration from any obligation in this regard.

Art. 7
The Competition Selection Board is identified in Annex A of this call, of which it forms an integral part.
At its first meeting, the Board appoints the Chairperson and the Secretary taking the minutes, and establishes the criteria and procedures for assessing the qualifications and the interview, where applicable.

The results of the assessment must be made known to the parties concerned at the interview, where provided for.

The Board can attribute to the selection a total number of 100 points (one hundred hundredths). At the end of its work, the Board formulates the overall merit list based on the total marks obtained by each candidate and draws up the minutes of the competition operations.
The grant may be awarded, subject to the ranking list, to candidates who have obtained a minimum overall mark of 70/100 (seventy hundredths).

The Board's judgement is final on the merits.

The ranking list will be made public exclusively by publication on the University's official notice board; the outcome of the assessment will not be the subject of personal communication to candidates.

Those who do not declare their acceptance of the research grant and do not present themselves at the structure where the research activities are to be carried out to sign the contract by the deadline communicated by the same to the email address indicated by the candidate in the application shall forfeit their right to the research grant, except for health reasons or reasons of force majeure duly documented and promptly notified.

Candidates holding qualifications obtained abroad, if successful, must submit the following, if not already attached to the application:

- **For degrees issued by a country that is a party to the Lisbon Convention (https://www.enic-naric.net/),** the following documentation:
  - *Supplement Diploma* or similar certificate in English issued by the competent University.
  - "Certificate of Verification of Foreign Qualification - CIMEA" issued by CIMEA (Centre for Information on Academic Mobility and Equivalences) via the "diplome" service at [https://cimea.diplome.eu/](https://cimea.diplome.eu/)

- **For degrees issued by a country not party to the Lisbon Convention (https://www.enic-naric.net/), one of the following options:**
  - Declaration of the on-site value of the qualification held and the certificate relating to the qualification with examinations and grades. The certificate in a language other than Italian or English must be accompanied by an official translation into one of those languages (certified by the competent diplomatic-consular authority or sworn at a court in Italy).
  - "Certificate of Comparability and Verification of Foreign Qualifications - CIMEA" issued by CIMEA (Centre for Information on Academic Mobility and Equivalences) via the "diplome" service at [https://cimea.diplome.eu/](https://cimea.diplome.eu/)

If the aforementioned documentation is not available at the time of the conclusion of the contract, the candidate must prove that he or she has requested it and submit it as soon as possible; if it is not submitted within six months of the start of the contract, the candidate will forfeit the contract and will be required to repay any related sums received to date.
The research activity cannot be started before the contract defining the terms of the collaboration is signed.

The activity covered by the research grant must have the following characteristics:

a) Be carried out in the context of the research programme covered by the grant and not be a purely technical support to the same.

b) Close connection with the implementation of the research programme that is the subject of the relationship with the winner.

c) Having a continuous and in any case temporally defined character, not merely occasional, and in coordination with the overall activity of the University.

d) Performance in a condition of autonomy, within the sole limits of the programme prepared by the Head of the same, without predetermined working hours.

The research fellow is obliged to submit a detailed written report on the work carried out and the results achieved, together with the opinion of the scientific supervisor, to the reference structure within the deadlines laid down in the contract. The research fellow will also have to submit interim reports and time sheets if requested by the reference structure and/or the scientific supervisor.

The research fellow is bound to strict confidentiality regarding the data and information to which he/she becomes privy in the course of his/her research activity. At the request of the scientific coordinator, he/she will be required to sign an appropriate confidentiality agreement.

The industrial property rights to the results obtained by the research fellow in the performance of the research activity belong exclusively to the University, without prejudice to the moral right of the research fellow to be recognised as an author or inventor.

The University reserves the right to revoke this call for competition for reasons of public interest, should the research project and/or the financial backing on which the research grant is based cease to exist. Should these causes arise after the contract has been signed, the University may terminate the contract without notice.

The following apply to the grant under this call:

- On tax matters, the provisions of Article 4 of Law no. 476 of 13 August 1984, as amended.
- On social security matters, the provisions of Article 2(26) et seq. of Law no. 335 of 8 August 1995, as amended.
- On compulsory maternity leave, the provisions of the Ministerial Decree of 12 July 2007.
- On sick leave, the provisions of Article 1(788) of Law No 296 of 27 December 2006, as amended.

During the period of compulsory maternity leave, the allowance paid by INPS pursuant to Article 5 of the Ministerial Decree of 12 July 2007 is supplemented by the University up to the full amount of the research grant.

The grant will be paid in monthly instalments in arrears.
Art. 10
The data collected as part of the procedure referred to in Article 5 is necessary for the proper management of the selection procedure, for the possible subsequent management of the research grant and purposes related to the management of the services provided by the University. The University of Udine is the Data Controller. At any time, the data subject may request access, rectification and, compatibly with the institutional purposes of the University, cancellation and restriction of processing or may object to the processing of his/her data. He/she can always lodge a complaint with the Italian Data Protection Authority. The full information is available on the University of Udine website in the “Privacy” section accessible from the home page www.uniud.it Direct Link: https://www.uniud.it/it/it/pagine-speciali/guida/privacy

Art. 11
For any matters not expressly mentioned in this call, reference is made to the relevant regulations in force cited in the introduction and to the "Internal regulations for the award of research grants pursuant to Law no. 240 of 30 December 2010" of the University of Udine issued by Rector's Decree no. 182 of 31 March 2021.

Art. 12
The official in charge of the proceeding is Dr. Sandra Salvador, Head of the Research Services Area of the University of Udine.

The reference office at the University of Udine is the “Area Servizi per la Ricerca - Ufficio Formazione per la Ricerca”, Via Mantica 31 - 33100 Udine.

To request information on the call, please complete the following form available on the University of Udine website: https://helpdesk.uniud.it/SubmitSR.jsp?type=req&accountId=universityofudine&populateSR_id=42105

Promozione della diversificazione nelle attività della maricoltura adriatica attraverso analisi, valutazioni di mercato e trasferimento di modelli di gestione.

Text in English:
Promotion of diversified Adriatic mariculture by marketing evaluations and transferability models.

Obiettivi previsti e risultati attesi del programma di ricerca in cui si colloca l’attività dell’assegnista di ricerca / Foreseen objectives and results of the research programme performed by the research fellow “assegno di ricerca”:

I bandi sono consultabili dal sito dell’Ateneo, del MUR e di Euraxess / The calls are available on the University, MUR and Euraxess websites

Testo in italiano:
I consumatori al giorno d'oggi risultano sempre più preoccupati e consapevoli riguardo a diversi aspetti salutari legati alle loro scelte di consumo, con relativa influenza sui loro acquisti. Questo particolare comportamento è stato studiato a fondo nel corso degli anni, ma la sua effettiva comprensione risulta molto complessa. Possiamo provare a prevedere approssimativamente come si comporteranno i clienti nelle diverse situazioni di acquisto, identificando e analizzando le diverse variabili che influenzano il processo. A volte, quando un nuovo prodotto alimentare viene reimmesso sul mercato, si imbatte in un rifiuto da parte dei consumatori, che la letteratura di riferimento ha definito “neofobia”. Da un punto di vista evolutivo, quando un prodotto alimentare e la sua produzione vengono reintrodotti potrebbe indurre sentimenti di rifiuto, e quindi di “neofobia”, sia da parte dei consumatori che da parte dei produttori. Il programma di ricerca intende fornire alcune soluzioni a questo problema e si inserisce in alcune attività previste nel progetto Interreg MARINET, acronimo del titolo: “MARICULTURE NETWORK: Implementation of new technologies for diversified sustainable aquaculture targeting healthy society and competitive regions”, di cui il nostro dipartimento (DI4A) è Lead Partner. Il progetto MARINET si articola in quattro Work Package: WP 1: Miglioramento della biosicurezza e della sostenibilità della maricoltura adriatica; WP 2: Valutazione dell’acquacoltura integrata e diversificazione della produzione; WP 3: Comportamento dei consumatori e accettabilità dei prodotti dell’acquacoltura in base alla qualità e alla sicurezza nutrizionale; WP 4: Diversificazione nelle attività della maricoltura adriatica attraverso analisi e valutazioni di mercato e trasferimento di modelli di gestione. Poiché le attività di ricerca si inseriranno in quelle previste nel WP4, si tratterà di definire un confronto con i risultati ottenuti dalle analisi di prodotto e mercato articolate nel Work Package 3, relativamente agli elementi innovativi dei prodotti a base di pesce e molluschi studiati nel progetto e riconoscibili dai consumatori, quali la sicurezza del prodotto, la qualità sensoriale, la conservabilità, il packaging e
l’etichettatura, e di articolare questi attributi di prodotto nell’analisi di sostenibilità economica della produzione adriatica di Flat Oyster Product (FOP), ovvero l’ostrica piatta (Ostrea edulis). Si procederà a stimare la domanda di mercato e a fornire una analisi dettagliata sui costi di produzione, proponendone un confronto tra prezzo e valore secondo la prospettiva dei consumatori. La trasferibilità dei risultati della ricerca verrà esplicitata con analisi economiche mediante il ricorso a modelli bioeconomici integrati in strumenti innovativi di intelligenza artificiale per il supporto decisionale nella piscicoltura.

Al fine di valutare la trasferibilità delle soluzioni progettuali sviluppate e congiuntamente ottenute nel Work Package 1, verrà effettuata un’indagine riguardante i costi di produzione (investimento e gestione), compresi i costi stimati di innovazione di prodotto e di processo, finalizzata a descrivere il processo di produzione attraverso un modello bioeconomico, come output da integrare in uno strumento di intelligenza artificiale innovativo e facile da usare per il supporto decisionale in piscicoltura. Per quanto riguarda la stima della domanda di mercato della Flat Oyster, al fine di fornire indicazioni per la diversificazione del reddito della piscicoltura: verranno identificate (a) le quote di mercato più sensibili alle innovazioni proposte nelle attività di produzione; (b) gli aspetti innovativi che appaiono più importanti per determinare le scelte dei consumatori ed evitare il rifiuto; (c) la diversa sensibilità delle quote di mercato al prezzo e il contributo di ciascun elemento innovativo al valore percepito totale. Si procederà quindi a stimare la quantità domandata di nuovi prodotti coltivati per un confronto tra i costi di produzione e valore/prezzo secondo la prospettiva dei consumatori. Per garantire la trasferibilità dei risultati, verranno organizzati due eventi per gli operatori di settore, con la possibilità di promuovere nuovi strumenti di supporto alle decisioni in piscicoltura. Il primo sarà un incontro introduttivo per l’impostazione del lavoro, mentre l’ultimo sarà un confronto tra imprenditori, operatori del settore e ricercatori dopo le simulazioni di mercato ottenute.

Text in English:

Consumers nowadays are increasingly concerned and aware of various health aspects linked to their consumption choices, with relative influence on their purchases. This particular behavior has been studied extensively over the years, but its actual understanding is very complex. We can try to approximately predict how customers will behave in different purchasing situations, identifying and analyzing the different variables that influence the process. Sometimes, when a new food product is offered on the market, it is possible detect a consumer rejection, which the relevant literature has defined as "neophobia". From an evolutionary point of view, when a food product and its production are reintroduced, it could induce feelings of rejection, and therefore "neophobia", both on the part of consumers and producers. The research program intends to provide some solutions to this problem and is part of some activities foreseen in the Interreg MARINET project, acronym of the title: "MARICULTURE NETWORK: Implementation of new technologies for diversified sustainable aquaculture targeting healthy society and competitive regions", of which our department (DI4A) is Lead Partner. The MARINET project is divided into four Work Packages: WP 1: Improvement of biosecurity and sustainability of Adriatic mariculture; WP 2: Evaluation of integrated aquaculture and production diversification; WP 3: Consumer behavior and acceptability of aquaculture products based on quality and nutritional safety; WP 4: Diversification in Adriatic mariculture activities through market analysis and evaluations and transfer of management models. Since the research activities will be part of those envisaged in WP4, it will be a question of defining a comparison with the results obtained from the product and market analyses articulated in Work Package 3, in relation to the innovative elements of the fish and shellfish-based products studied in the project and recognizable by consumers, such as product safety, sensorial quality, shelf life, packaging and labelling, and to articulate these product attributes in the economic sustainability analysis of the Adriatic production of Flat Oyster Product (FOP), i.e. the flat oyster (Ostrea edulis). We will proceed to estimate market demand and provide a detailed analysis of production costs, proposing a comparison between price and value from the perspective of consumers. The transferability of the research results will be clarified with economic analyses through the use of bioeconomic models integrated into innovative artificial intelligence tools for decision support in fish farming.

In order to evaluate the transferability of the solutions developed and jointly obtained in Work Package 1, an investigation will be carried out regarding the production costs (investment and management), including the estimated costs of product and process innovation, in order to describe the production process through a

bioeconomic model, as an output to be integrated into an innovative and easy-to-use artificial intelligence tool for decision support in fish farming. Regarding the market demand for Flat Oyster, in order to provide indications for the diversification of fish farming income: (a) the market shares most sensitive to the innovations proposed in production activities will be identified; (b) the innovative aspects that appear most important for determining consumer choices and avoiding waste will be also identified; (c) the different sensitivity of market shares to price and the contribution of each innovative element to the total perceived value will be also identified. We will then proceed to estimate the quantity demanded of new cultivated products for a comparison between production costs and value/price from the perspective of consumers. To ensure the transferability of the results, two events will be organized for sector operators, with the possibility of promoting new decision support tools in fish farming. The first will be an introductory meeting to set up the work, while the last will be a comparison between entrepreneurs, stakeholders and researchers after the market simulations obtained.
